

Water, Hygiene And Sanitation In Senegal (WASH)

our PARTNERS

WORLD VISION INTERNATIONAL SENEGAL

Our vision for every child, life in all its fullness. Our prayer for every heart, the will to make it so. World Vision is a Christian relief, development and advocacy organization dedicated to working with children, families, and communities to overcome poverty and injustice.

World Vision serves everyone, regardless of religion, race, ethnicity, or gender. Since 1984, World Vision has worked with the poorest communities in Senegal to address the root causes of poverty and injustice.

We bring lasting change to the most vulnerable communities through integrated programs that last at least fifteen (15) years and special 3 to 5 years projects in ten of the fourteen regions of the country, namely in Dakar, Kaolack, Fatick, Kaffrine, Tambacounda, Kolda, Kédougou, Sédhiou and Ziguinchor thanks to the daily work of our 220 employees.

In its sectors of intervention, World Vision Senegal works in partnership with national and local government, faith-based organizations, other like-minded NGOs, and multilateral and bilateral agencies such as USAID, GAC, EU, the WFP, Enabel, the Global Fund and the World Bank.

our OBJECTIVE

Improve access to water, sanitation facilities and good hygiene practices. The well-being of children and families is impossible without sustainable and equitable access to drinking water, dignified sanitation, and appropriate hygiene behaviors.

We believe that every child deserves and has the right to safe drinking water.

We are determined to guarantee it!

our APPROACH

In Senegal, the WASH Program uses a range of approaches to achieve its general objectives in development and emergency contexts. Our program focuses on WASH in communities, health facilities, schools, and emergencies.

1. Increase access to a clean and sustainable water supply for poor and vulnerable communities and children.
2. Increase access to improved sanitation for poor and vulnerable communities and children.
3. Improve knowledge on hygiene promotion and behavior change practices for poor and vulnerable communities and children.

our IMPACT

October 2019 and September 2021

+ 55,678

people have access to water

+ 58,237

people have access to improved household sanitation

+ 134,302

people reached by hygiene behavior change programs

+ 23,207

households sensitized with recommended point-of-use water treatment techniques in use

+ 10,360

children with access to BASIC sanitary facilities in schools

+ 22,531

children who have access to a BASIC handwashing facility in a school

+ 8,583

children in a school have access to BASIC drinking water
