Key Message

At the heart of World Vision’s response, is a deep concern about the impact that COVID-19 health crisis could have on the children and the communities we serve.

We urge the world to unite to focus on the most vulnerable children, especially refugees and displaced children, and those living in communities with low access or weak health systems.

World Vision is responding, and its Global Health Emergency Response to the most vulnerable people is centered on 17 countries, seven of which are in Asia-Pacific, through a multi-sectoral approach. Working in collaboration with local authorities, frontline health workers, academic institutions, faith leaders and communities, and local NGOs.

IMPACT ON PROGRAMMES

Non-COVID-19 related regular programming across Asia Pacific is experiencing some delays as a result of the crises. We are monitoring the impact and will have a comprehensive update in the next report.
