

Sudan has made significant progress in ensuring populations have access to basic water, sanitation and hygiene services and facilities. As at 2019, an estimated 73% of the population had access to safe water, 25% were practicing hand washing with soap, and 31% had access to basic sanitation, according to the Sudan SDG 6 Plan. The situation however remains dire among the most vulnerable populations, particularly in areas that have experienced significant influx of internally displaced persons, refugees and returnees.

Intervention	Strategic goal	Strategic outcome
World Vision has been working closely with local NGO partners and the Government to address some of the critical gaps in water infrastructure, basic sanitation facilities and hygiene services.	To increase access to safe water, improved sanitation and proper hygiene for vulnerable populations is one of World Vision's key strategic objectives.	Children are protected from water and sanitation related diseases.

▶ **Our impact in numbers for 2019** ◀

 Water	 153,100 <small>PEOPLE</small> gained access to safe drinking water and for household use	 15,017 <small>CHILDREN</small> had access to safe drinking water in schools	 27 <small>HEALTH FACILITIES</small> connected with safe water supply systems
 Hygiene	 73,948 <small>PEOPLE</small> were reached with hygiene behaviour change programming	 5,414 <small>HOUSEHOLDS</small> had hand washing facilities installed in their homesteads	 34,017 <small>CHILDREN</small> had access to hand washing facilities in their schools
 Sanitation	 27,688 <small>PEOPLE</small> people gained access to improved sanitation facilities	 3,390 <small>CHILDREN</small> had access to basic sanitation facilities in their schools	 19 <small>HEALTH FACILITIES</small> health facilities supported with basic sanitation services
