

## Child Friendly Activity Cards Monitoring & Evaluation Form – for child

*Instructions:* This brief survey is a simple tool to measure the outcomes of using this set of activity cards, as well as to collect feedback from children age 6 and above, caregivers and their family members. The survey should be done at least <u>one month after</u> the distribution of the cards to the households. Use one form per child, you can choose to survey only the child <u>or</u> both the child & adult (see form for adult) separately in one household but the total sample size of the children and the adult groups should be similar. Please compile the data for analysis that will support ongoing improvements of the activities.

ar. Ple	ase compile	e the data fo	r analysis that w	ill support ongoing ir	mprovements of the	ne activities.
