

Country context

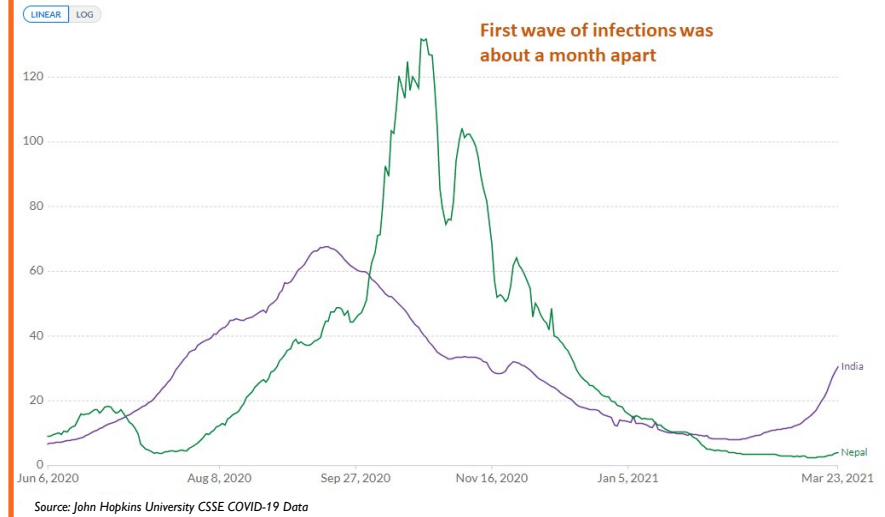

Daily infections and testing

Nepal and India comparison

Daily new confirmed COVID-19 cases per million people

Shown is the rolling 7-day average. The number of confirmed cases is lower than the number of actual cases; the main reason for that is limited testing

RESPONSE GOAL

To limit the spread of COVID-19 and reduce its impact on vulnerable children and households

Our key interventions

Support the government health facilities with emergency needs (oxygen cylinders, PPEs, hospital beds, Infrared thermometers, sanitisation sprays, gloves, masks, face shields, etc.)

Support Holding Centers with needed materials including beds

Disseminate integrated risk communication messages on COVID-19 related symptoms and services, preventive behaviours, vaccination and isolation

Provide psychosocial counselling support

Capacitate local governments on contact tracing, home isolations, and vaccination drive

Support grade 1-5 students with self-learning materials, and alternative classes for students above grade 5 through radio

Support the COVID-19 and monsoon affected families with cash for livelihood options (consumption support, agri-input support, business recovery support and NFI kits support)

Support the Government of Nepal at all levels together with Association of International NGOs in Nepal (AIN) to implement cohesive and coordinated response

Our targets

53K children

42K adults

14K households

50K indirect beneficiaries incl. children

Our sectors

Health

Food Security & Livelihood

Education

Protection

Our resources

1.5 million (USD)

May
June
July

Our focus

- Kanchanpur, Bajhang, Doti, Achham, Kailali, Jumla and Banke (through West Field Office)
- Kathmandu and Lalitpur (through Urban Programme Office)
- Lamjung, Sindhuli, Udayapur, Rautahat, Sarlahi, Mahottari and Dhanusha (through East Field Office)

Note: WVI Nepal will also respond in Banke and Dhanusha in addition to its working areas considering increasing number of COVID-19 cases in the two districts.
