Since the first outbreak of the COVID-19 pandemic in the Occupied Palestinian Territory (oPt), World Vision Jerusalem - West Bank - Gaza (JWG) highly responded to the needs of the Palestinian community in the West Bank. The preparedness of the organization goes back to the preparedness of its teams to deal with emergency situations, and to the partnership it shares with the Palestinian Ministry of Health, as well as the local government units in the villages of its operations. These enabled World Vision JWG to maintain close connection to the real grassroots, community-based needs, as well as strategic decision-making at the national strategic level.

World Vision JWG still works to immediately respond to the COVID-19 epidemic and also on long-term response planning to deal with the impact of the virus in the interest of the most vulnerable societies and children.

In order to organize and ensure effective interventions, World Vision was quick to establish its key objectives contributing to three main areas that are part of the national response plan: (a) Risk Communications & Public Engagement. (b) Infection Prevention & Control. (c) Surveillance.

Our goal is that boys and girls in the oPt have improved resilience, live in a nurturing environment and have hope for the future.

SO 1. Children, especially the most vulnerable, are cared for and protected in families, in communities, and in the country.
SO 2. Boys and girls are able to meet their full potential and become active citizens.

World Vision believes every child is created equal in God’s sight, but injustice, corruption, inequality and disasters keep them from lives filled with hope, promise and well-being. In response to this, we connect with and mobilise partners who share common values of compassion, love and mercy to transform children’s lives. World Vision serves all people regardless of religion, ethnicity, race or gender.
