Our National Impact Report 2020
MESSAGE

The National Director’s Foreword

It is my pleasure to share with you the World Vision International Sierra Leone (WVISL) 2020 Annual Report. The achievements and impact narrated in the following pages that you will read, represents the results of an entire team of World Vision Sierra Leone staff, partners, community members and children’s relentless efforts. The effective collaboration between World Vision Support Offices, West Africa Regional Office and WVISL has greatly contributed to these successes.

I am so grateful to the entire staff of WVISL, the Advisory Council and all the community volunteers who tirelessly worked for and with the children, particularly the most vulnerable, to help them unleash their God’s given potential to enjoy life in all its fullness.

The fiscal year 2020 started well with the implementation of interventions in Health and Nutrition, Water, Hygiene and Sanitation (WASH), Education, Child Protection, Livelihood, Advocacy, Faith and Development, and Child Sponsorship. Tangible improvements in the lives of children, particularly the most vulnerable, to help them unleash their God’s given potential to enjoy life in all its fullness.

In March 2020, the COVID-19 pandemic unfortunately struck Sierra Leone among many other countries globally. In response to the pandemic, World Vision partnered with the Government, communities and children to work along four major areas: (1) prevention of the spread of COVID-19, (2) health system strengthening, (3) support to children impacted by COVID-19 through education, child protection, food security, and livelihoods and (4) collaboration and advocacy for vulnerable children protection. Thanks to the effective and timely implementation of the WVISL COVID-19 Response Plan, no staff or Registered Children (RC) in our operational areas were died of COVID-19 disease.

We owe these results to the faithful support of our private and public donors, our hardworking staff, community volunteers and partners and our agility as an organization to adapt to the “new normal”.

As we look into the fiscal year 2021 with the hope of the availability and far access to the COVID-19 vaccine and the progressive return to normalcy, I want to express my sincere gratitude to the Government of Sierra Leone for the effective partnership in its various ministries for the promotion of the well-being of children. My thanks also go to the donors who, despite difficult times, kept their pledge and entrusted us with financial resources to run ongoing projects. I am grateful to all partners and World Vision staff for their invaluable commitment to the World Vision ministry.

My role as a prayer as an organization that God’s blessings rest upon all of us as we continue to serve most vulnerable children of this beautiful and peaceful country of Sierra Leone.

James Nkémba
National Director/World Vision International Sierra Leone

The Annual Report provides an overview of the work of World Vision Sierra Leone from October 2019 to September 2020. All information and figures in this report reflect the impact we were able to achieve thanks to the contributions of our donors.

We are World Vision

World Vision is an international partnership of Christians whose mission is to follow our Lord and Saviour Jesus Christ in working with the poor and oppressed to promote human transformation, seek justice and bear witness to the good news of the Kingdom of God.

We are driven by our desire to ensure that every boy and girl has what they need to grow in mind, body and spirit. Our more than 37,000 staff work hard to empower children to live lives filled with joy, become all Jesus created them to be and to go further than they could ever have imagined.

Guided by more than 70 years of experience and expertise, our dedicated staff employ proven, effective development and relief practices to empower communities to become self-sufficient and bring real, lasting change.

As a leading global partner, we labour alongside supporters, stakeholders, families and communities to transform lives and bring hope and, as a result, our lives are enriched. Together, with our partners we positively impacted the lives of more than 230,000 children in Sierra Leone in the West Africa Region and 200 million vulnerable children around the world.
Overview of Sierra Leone priority sectors

Today, World Vision supports more than 682,884 (336,613 boys, 346,271 girls) children through 28 long-term area development programmes in 29 chidhoods in Bomba, Foba, Bo, Kano, Kailahun and Pujehun districts.

Community Engagement

World Vision’s approach is community-based, ensuring communities lead their own development programmes and processes while empowering them with required skills and resources that help create safe, nurturing environments for children. Our multi-sectoral programmes address critical issues, such as health and nutrition, education, WASH, advocacy, economic development, child protection and participation and disaster risk reduction.

Health and Nutrition

World Vision’s strategy focuses on evidence-based, cost-effective preventive practices that address the primary causes of maternal and child mortality and illness. Our core emphasis is an aggressive campaign to reach all children under the age of five and we work with health professionals to implement Maternal and Child Health. World Vision is also using mobile phone technology to seed and sustain maternal health information.

Ensuring that children enrol in school and stay in school is a priority for World Vision. Our goal is that all children in the communities we work with are functionally literate by age 11. To accomplish this, we work with teachers for them to have strong strategies to support Children’s Literacy and Help communities parents and caregivers provide modelled support for their children’s learning. World Vision also work with education authorities for the improvement of education services and policy implementation as well as ensuring learning environments are safe and free of violence.

Child Protection and Participation

Children are vulnerable to abuse, violence, exploitation and child labour in Sierra Leone. World Vision pursues a systems approach to strengthening child protection within the broader programming and advocacy as child well-being is based on holistic and inter-related factors. World Vision works on preventing Violence Against Children, strengthening reporting and referral pathways and coordination between state and non-state actors.

For the un achieves.

World Vision has been working on increasing access of population to safe drinking water and improved sanitation. We collaborate with the government of Sierra Leone and the communities towards universal coverage through our integrated WASH programming. In particular, World Vision has intensified its WASH interventions as part of the Covid-19 preventive measures. We also work with faith actors to promote hygiene and behavior change in the communities.

Mental Health and Well-being

To achieve sustained child well-being goals, World Vision integrates multi-sectoral cross-cutting themes across its core sectors. Community engagement, economic empowerment; gender, social inclusion, disability awareness, interfaith collaboration are all mainstreamed in programming.

Governance

World Vision also build relationships with community and civic organizations as well as local, national and international NGOs to improve effectiveness of our programming in our targeted areas. World Vision is an active member of the Non-Governmental Organizations (NGO) forum.

For the un achieves.

In 2021 Financial Year (FY21), World Vision has 380 about staff members working on effectively and efficiently achieving our targets in our area programmes. Sector specialists include professionals in child protection, health, nutrition, WASH and education.
When the Disease (COVID-19) shocked the world, Sierra Leone became worried because of the experience it had from the Ebola disease outbreak in 2014. Unfortunately, COVID-19 struck the country on 30th March 2020 when the first case was confirmed.

In the context of the COVID-19 outbreak, the country immediately suffered from International and National market disruptions – producers, suppliers, and retailers affected by movement restrictions leading to an increase in food prices, which affected access to food and nutrition. The situation worsened, with broader impacts on livelihoods due to border closures, restrictions of movement, and economic slowdown.

The COVID-19 pandemic further exposed the extreme inequalities with children. From poor households consistently facing greater challenges. Without running water at home, children have been unable to regularly wash their hands. Living in crowded homes with substandard housing has made it difficult for them to follow social distancing guidelines. Sierra Leone records one of the highest rates of chronic malnutrition globally, with a prevalence of 31.3 percent, below global standards of <10 percent, according to the National Nutrition Survey 2017. This situation was, in effect, caused due to the constant lockdowns and restrictions.

In Sierra Leone, the current disruption of lessons further jeopardizes an already low completion rate for junior secondary, which is at only 49 percent. The pandemic also has the potential to worsen the numeracy and reading skills, which are already undeniably low among students across Sierra Leone. The lack of IT and internet infrastructure has limited their access to online or remote schooling.

World Vision International Sierra Leone continued providing essential support to the most vulnerable communities, as many children needed assistance. WVSI quickly repurposed 20% of the Area program budgets to suit the needs of the most exposed and vulnerable communities. WVSI responded with two million, five hundred and fifty thousand USD, and later added one hundred and fifty thousand USD from a private non-sponsorship. This brought the total response budget to two million four hundred and thirty-nine thousand USD. These funds supported the provision of infection prevention and control materials, psychosocial support, training of teachers to develop multimedia education materials, provision of radios for home learning, designing specific education materials, food and non-food items for vulnerable households, and children leaving in quarantine homes among others.

Total number of people targeted for COVID-19 response was 553,928 and reached 553,919 (114,065 girls; 787,183 boys; 202,380 women and 160,734 Men).
Overall, 1,021,147 people were reached through World Vision intervention in Sierra Leone.

Our National Impact 2020

105,036 BOYS
125,137 GIRLS
405,440 WOMEN
385,534 MEN

- 105,036 Boys
- 125,137 Girls
- 405,440 Women
- 385,534 Men

6,063 Children, reached with targeted age-specific health education
14,999 IEC, COVID-19-related materials printed and distributed
17,131 Community-level public hand-washing stations (眼皮) established or reinforced for COVID-19 prevention
131,833 FaceMask, distributed to health facilities, CHWs, and caregivers for COVID-19 support
978 Hygiene, comprehensive kits distributed for COVID-19 prevention
140,328 Gloves, set distributed to health facilities, CHWs, and caregivers for COVID-19 support
536 FaithLeaders, disseminating preventive messages for COVID-19 prevention
6,870 HandWashing, Supplies distributed for COVID-19 prevention

1,332 Medical, personnel provided with personal protective equipment (PPE) in health facilities
744,161 People, reached with preventive behaviour messaging on COVID-19
2,120 CHWs, trained and supported to provide community-based services for COVID-19 prevention and control
3,831 Community, members including caregivers provided with COVID-19 preventive materials

9,564 NationalPrimarySchoolExamination, 8,074 BasicEducationCertificateExaminations, 4,382 HighSchoolCertificateSecondarySchoolCertificate, candidates were supported with face masks to protect them from COVID-19 during national examinations

Supported the Teaching Service Commission (TSC) to conduct refresher training for 42 teachers in the nationwide radio-teaching programme.
Provided 34,000 rechargeable solar powered radios to support families households to benefit directly from the nationwide radio-teaching programme.

Our COVID-19 RESPONSE
**Our National Impact 2020**

**Health**

800 Adolescents completed Life Skills course and improved their public speaking, negotiation and self-awareness skills.

2,650 Trained, Community Health Workers provided health services at the household level to 22,600 people.

77 COMM, remittances actively engaged in improving access to essential health services for pregnant women, lactating mothers and children.

1,755 CHW, implemented the ttc model to improve maternal, newborn and child health. They referred 14,468 children under five years to health facilities for routine vaccinations.

10 COMM, groups established linkages with local health facility and providers.

246 Health, facilities were provided with essential drugs and supplies.

84% Health, facilities in World Vision programme areas reported to stock outs of Cotrimoxazole Sulphate and zinc, for diarrhoea case management.

CHW registered 6,157 pregnant women and 1,719 newborns and 6,000 children attended antenatal care visit. They provided the full package, including immunization, deworming, intermittent preventive treatment (IPTP) for malaria, and Long Acting Insecticide treated Nets (LARTNs). 720 women gave birth at the health facilities and were attended by skilled birth attendants.

**Nutrition**

100,000 Multi-Vitamins Pills, distributed to the Ministry of Health and Sanitation.

18 Grandmothers, groups provided support on Antenatal Care and breastfeeding to 2629.

Supported Ministry of Health and Sanitation with therapeutic food (RUTF) to rehabilitate 811 malnourished children.

Supported Ministry of Health and Sanitation with 1,400,000 tablets of albendazole.

Supported mothers support group to reach 6451 of caregivers with nutrition awareness messages.

**Advocacy**

5,600 Boys & Girls, were trained through the ‘It Takes a World Campaign to end sexual violence against children using a multimedia approach.

332 Parents, trained in courses/workshops that tackle positive discipline (i.e. Celebrating Families, and other CP issues).

810 Community members, were reached through awareness raising sessions and accessed to child protection information.

World Vision partnered with UNICEF, Action Against Hunger and UNFPA to develop (1) guidance notes on maternal, infant and young child nutrition in the context of COVID-19 for health workers in Sierra Leone and (2) Infant and young child feeding booklet in the context of COVID-19.

World Vision was appointed by NACCWHC and SUNGO as the lead NGO to coordinate COVID-19 response activities in Bomba District.
Children, oriented to child sponsorship and how it enables child well-being.

114 Community, members trained on sponsorship essentials

2,070 Children, benefited from gift notification

Parents,

205 Parents, demonstrated increased knowledge in positive disciplining and other CP related issues

32,306 Community, members were reached through children radio program awareness-raising on child protection issues

5,851 Children, under 5 years old were cared for by 1,231 Savings Group members

1,642 Community, members trained on sponsorship monitoring

444 Local Partners, trained on sponsorship monitoring

1,855 Children, oriented to child sponsorship and how it enables child well-being.

2,070 Children, benefited from gift notification

Our National Impact 2020

WASH

67 Solar mechanized boreholes constructed in 28 communities, 11 schools, and 1 health-care facility. This enabled 71,638 people to access safe water from a basic drinking water source.

324 Sex-Separated, and disability-friendly latrine stalls constructed with menstrual hygiene facilities in 17 primary schools. This gave access to 6,923 children with sanitation facilities in Schools.

31 Latrineblocks, or stalls each with 1 health care facilities constructed and enabled 11,664 people who had not had access the health facility or were admitted in the health facilities to access basic sanitation facilities.

1,203 Households, constructed sanitation facilities, which enabled, 444 community members, accessed sanitation facilities constructed through the CLTS approach.

57,671 (18,353 males, 37,318 females, 7,817 boys, and 7,722 girls) constructed habitations received on proper hygiene, especially the importance of handwashing.

Trained 90 school health club members (boys) and girls 16 on menstrual hygiene management.

104 primary schools have a basic handwashing facility (with soap and water) which is accessed by 31,767 16,090 boys, 15,677 girls students.
Faith and Development

107 Churches,
and Faith Based Organizations involved in holistic ministry

315 People,
participated in interfaith events

125 Muslims & Christians
(c. male, female) Muslim and Christian faith leaders trained on sanitation and hygiene behavior change communication. These faith leaders reached 125,711 people with hygiene and sanitation messages. As a result, the sensitization by the faith leaders and community health volunteers, 22,236 households constructed tippy taps.

536 faith leaders disseminating preventive messages for COVID-19 prevention

7,188 children participated in spiritual nurture activities

150 people were trained on teaching families curriculum

350 faith leaders participated in channels of hope workshop for maternal child health and child protection

Through the partnership with the InterReligious Council of Sierra Leone, 659 faith leaders were sensitized on COVID-19 prevention messaging who later disseminated information through social media platforms, face-to-face, (maintaining social distance and IPC measures), and radio to their congregants and the general community.

Education

1,017 Schools,
supported with teaching and learning materials and established 180 functional reading camps in Bo, Bonthe, Pujehun, and Kono districts.

WWSL is currently supporting 76 youth at the Women and Youth Strengthening (WAYS) vocational institute in Bo through the Education and Youth Empowerment (EYE) project. This project aims at promoting vocational education and training for youth in Tonkolili Chieftaincy.

WWSL is leveraging digital technology to promote Unlock Literacy (UL) and Numeracy in 40 primary schools.

DME

Conducted assessment and design for three new area programs in Koinadugu and Falaba districts.

Collaborated with Statistics Sierra Leone to conduct technical program baseline in Kono, Falaba, Bo, Pujehun, and Bonthe districts.

Conducted program accountability assessment in 25 area programs and initiated process for setting up a program accountability system.

Conducted child-led research in Jajama Bondor Area Programme
Financial Summary

Thanks to the generous support and contributions from individuals, institutions, government agencies and corporations, World Vision International Sierra Leone’s total budget for FY2020 was US $19,033,725 (cash funding). This funding allowed us to deepen our impact in rural communities bringing transformational development while reaching out and bringing hope to the most vulnerable children in Sierra Leone.

Our intervention has been challenging on many fronts, as the global health pandemic brought unprecedented changes in people’s lives while affecting much of the
