Who We Are & How We Work

TIMELY AND TAILORED TECHNICAL SUPPORT

The Technical Service Organization (TSO) is a global consultancy group based within World Vision International. The health and nutrition team comprises 11 highly experienced public health and nutrition professionals from Asia, Africa, Europe and the Americas, able to combine skills and contextual knowledge to provide technical support. Our multi-disciplinary approach to health programming draws from evidence-based models to support World Vision programmes and partners in developing and implementing high quality community health and nutrition approaches.

We take an adaptive and empowering approach to consultancy. We listen carefully to the client and co-create an approach to each assignment. We operate in many languages including English, French, Spanish, Amharic, Swahili and Portuguese. We tap into our networks of practitioners and academic institutions to ensure that we utilize proven approaches and tools, and promote multi-stakeholder initiatives for strengthening health and nutrition systems.

EXAMPLES OF SERVICES PROVIDED:

- Facilitated health and nutrition strategy and technical programme development for World Vision national offices including subnational planning, costing and monitoring frameworks,
- Facilitated collaborative design workshops for national and multi-stakeholder community health programmes for field offices,
- Successful and timely proposal development for major donor calls (e.g. USAID, DFAT, UN Agencies, World Bank, Global Fund, EU and DFID) for proposals on health systems strengthening, Reproductive Health, infectious diseases including HIV/AIDS, Malaria and Tuberculosis, Maternal and Child Health/Nutrition,
- Delivered capacity building and mentoring of mid-level health professionals focusing on maternal and child health, infant and young child feeding and community health systems strengthening as well as training and mentoring technical staff on H&N core project models,
- Facilitated and led training curriculum development and adaptation for community health workers and other frontline workers,
- Developed competency-based blended learning programmes, including e-learning courses to support project staff in over 38 countries
- Led health and nutrition baseline assessments and project end and technical program evaluations for field offices,
- Conducted barrier analysis studies for a behavioral change strategy and health and nutrition education materials,
- Served as a surge capacity in grant programs as a health and nutrition program technical lead and deputy chief of party,
- Humanitarian rapid-response deployment including emergency nutrition programmes,
- Conducting mid-term review and bottle neck analysis,
- Statistical analysis and preparation of research reports, academic writing and publication.

Client Testimonial

“It was great working with TSO. The Technical Advisors were quick at reviewing, asking good questions & challenging where necessary. I would definitely consider working with TSO again. Good quality inputs and challenge and really quick turnarounds.” Support on a technical review of a proposal focused on Health and Nutrition in Somalia led by WV UK, Jan 2019.

“I am quite impressed with the support I received. It’s the first time I have ever used the TSO support and I am simply impressed the way I have been supported.” WV Nepal for the support provided in analyzing anthropometric data for nutritional indicators, Jan 2019

“The TSO has provided excellent guidance and support in finalising the Pathway of change and also on drafting TP logframe and TP Design document.” Technical support for TP Design on Nutrition – WV India.

“The Technical Advisor was an immense pleasure to work with and very helpful from the beginning until the end of our Health project proposal development process. Thank you so much for all the technical leadership and input provided.” WV US, December 2019.

“The TA provided exceptional technical support during the workshop preparation and facilitated various sessions during the forum.” SAR, May 2021.
