

VANUATU

THIS
MEANS
THE
WORLD

OUR PARTNERS

FACTS

- Vanuatu is positioned within the earthquake-prone 'ring of fire' and at the centre of the Pacific cyclone belt.
- Vanuatu experiences frequent volcanic eruptions, cyclones (up to category five), earthquakes, tsunamis, storm surges, coastal flooding, and landslides.

World Vision has been partnering with communities in Vanuatu for over 40 years and currently has programmes across five of Vanuatu's six provinces. World Vision Vanuatu serves the most vulnerable by reducing gender-based violence; enabling resilient livelihoods; ensuring inclusive access to water, sanitation and hygiene; and responding to humanitarian disasters.

KEY INTERVENTIONS

We prepare

communities & stakeholders to ensure they are well equipped to respond, recover, and have increased resilience, to future disasters & climate change.

We coordinate

with government & other stakeholders to ensure our response activities are relevant & complimentary to national & provincial efforts.

We mobilise

our staff & extensive community & church networks to distribute emergency non-food items & awareness to meet the immediate needs of community members post-disaster.

We partner

with faith & community leaders to promote strategies for dealing with increased stress & violence during disasters to improve the safety of women & children.

We support

vulnerable households, including those that are headed by females & where we know people with disabilities are living.

We fund

local partners to conduct assessments & implement response activities to promote localisation & capability strengthening.

We prioritise

the procurement of local products for emergency distributions wherever possible to support the local economy & livelihoods.

We adhere

to international humanitarian principles & protocols & work through our national cluster system to ensure our response is locally appropriate.

NOTABLE PROJECTS

COVID-19 preparedness and response

37% of Vanuatu's population were reached
100% of participants felt satisfied overall with their WASH kits.

21,398 people benefitted from more hygienic public spaces.

- > **Donor:** USAID BHA
- > **Timeline:** July 2020 – July 2021
- > **Budget:** USD 1.8 million
- > **Reach:** 112,000 people

We integrate

solutions across all our programming to ensure that the needs of community members living with disabilities are considered & met, particularly during response efforts.

We leverage

relationships, knowledge and tools from our full suite of community development programming so that our humanitarian responses are informed by best practice solutions.
