## FACTS

- 70% of Vietnam's population resides in coastal communities that are exposed to the adverse impact of rising sea levels.
- Vietnam is ranked among the five countries most impacted by climate change.
- 2020's disasters in Vietnam caused 282 deaths, 64 missing cases, and a total damage of USD 1.52 billion.

*As a member of the National Disaster Risk Reduction Partnership, World Vision International - Vietnam commits to effectively implementing natural disaster prevention and control, and climate change adaptation activities; minimizing human and property losses and damages; and protecting the environment for sustainable socio-economic development.*

## KEY INTERVENTIONS

### Community-based disaster risk reduction

Consolidate authorities' and community people's efforts in preparing for, responding to and recovering from disasters in order to reduce their vulnerability and mitigate the damages in the event of disaster and the context of climate change

In complementary to strengthening capacity for community-based disaster risk management planning, we also reinforce training on disaster risk reduction and response to climate change for children, local community members, and local rapid response teams.

### Enhancing resilience for ethnic minorities in Luc Yen District

*Increase resilience to disasters for ethnic minorities in Dien Bien province through the application of climate-smart livelihoods, water solutions, and community-based disaster risk management*

- **Donor:** ADH
- **Timeline:** April 2021 – March 2022
- **Budget:** USD 390,000
- **Reach:** 9 communes of Tua Chua and Dien Bien Dong Districts

## NOTABLE PROJECTS

### Ethnic minorities resilient to disasters

*Increase resilience to disasters for ethnic minorities in Dien Bien province through the application of climate-smart livelihoods, water solutions, and community-based disaster risk management*

- **Donor:** ADH
- **Timeline:** April 2021 – March 2022
- **Budget:** USD 390,000
- **Reach:** 9 communes of Tua Chua and Dien Bien Dong Districts

### Forecast-based early action

*Enhance inclusive and gender-responsible forecast-based early action for effective disaster preparedness by strengthening awareness, capacity, and resilience of local communities and actors, and supporting them to operationalise anticipatory action frameworks for floods and droughts*

- **Donor:** DG ECHO
- **Timeline:** July 2021 – December 2022
- **Budget:** EUR 143,000
- **Reach:** 6,578 direct at-risk and hard to reach communities in Ham Thuan Bac and Binh Thuan Provinces
