SOLOMON ISLANDS

THIS MEANS THE WORLD

OUR PARTNERS

World Vision
Hope, Joy and Justice for ALL Children
FACTS

• In 2020, category 3 cyclones claimed 27 lives.
• In 2013 a tsunami struck the eastern end, destroying 588 homes, killing 10 people and injuring 15 others.
• In 2007, a tsunami struck the western end, killing 52 people.
• Sea-level rise is eating away villages in small islands such as Ongtong Java and Sikaiana.

KEY INTERVENTIONS

Climate Smart Agriculture
Establish and maintain model farms through village disaster climate risks committees, from which villagers learn and replicate the learning into their own farms to increase their household supply of healthy and accessible food supply

Simplification of early warning system for cyclones
Simplify languages by using maps and color codes to enable community people with low literacy levels to understand and quickly carry out preparatory measures in the event of an approaching tropical cyclone

As one of the largest and longest-standing international NGOs in the Solomon Islands, World Vision International – Solomon Islands is a trusted, reputable partner of the government, CSOs, donors, and sectoral bodies. We proactively seek out to either implement projects as a lead, partnering organization, or to feed into key discussions around strategies at the national and multi-lateral levels.

NOTABLE PROJECTS

COVID-19 preparedness
Build community resilience to livelihood and economic shocks caused by COVID-19 and future disasters through increased access to and capacity for socially inclusive and safe livelihood options Increase access to equitable, inclusive and sustainable WASH facilities and resources as well as improve safe hygiene practices among target communities, schools, and clinics

> Donor: AHP and BHA
> Timeline: 2020 – 2022
> Budget: USD 3.16M
> Reach: Over 67,500 indirect beneficiaries

Disaster risk reduction
Improve local disaster preparedness and response by incorporating the needs of women, people with disabilities, and youth into action plans and simplifying early warning and response systems

> Timeline: 2018 – 2022
> Budget: USD 605,241
> Reach: 3,287 men, women, youth and children
