

GLOBAL HUNGER RESPONSE

Situation report #2 | September 2022

World Vision

The world is facing a massive hunger crisis. **Tens of millions of children and their families are confronted with starvation.** Conflict, COVID-19, and climate change are acting as drivers of this crisis.

Nearly **50 million people** are on the edge of famine in 45 countries. World Vision is responding to this global emergency with a **US\$2 billion** appeal – the largest in organisational history.

Food assistance and other life-saving support is immediately needed to prevent the deaths of thousands of people. Despite efforts from the United Nations (UN) and agencies like World Vision, needs continue to outweigh the size of international funding. The Response is targeting **22 million people in 25 hotspot nations.*** Elsewhere World Vision continues to monitor the situation and is working to adapt programming and responses where cost-of-living price shocks are hurting the vulnerable.

* East Africa Emergency Hunger Response: Ethiopia, Sudan, South Sudan, Kenya, Somalia, Tanzania, Uganda; West Africa Emergency Hunger Response: Mali, Burkina Faso, Niger, Chad, CAR, Mauritania; in the Middle East and Eastern Europe: Afghanistan, Syria, Lebanon, Yemen; in Southern Africa: DRC, Angola; in Latin America and the Caribbean: Venezuela, Guatemala, Honduras, Haiti; in Asia Pacific: Myanmar, Sri Lanka.

People reached

 **15,796,019**

Men 3,069,932

Women 3,944,702

Children 8,781,385

Boys 4,088,742 Girls 4,692,643

*Based on figures as of 24 August 2022. People reached includes people supported in GHR's 25 countries of highest alert from 01 March 2021 through the current reporting period (31 July 2022).

Situation overview

Nearly 1.5 times more people (46%) – 50 million – are facing severe levels of acute food insecurity across the globe than 15 months ago. A massive hunger crisis is building as tens of millions are marching towards starvation, with children being at the forefront of this crisis.

The World Food Programme (WFP) reported that the number of people experiencing hunger has now reached 345 million – a 25% increase since the beginning of 2022 – due to the war in Ukraine continuing to supercharge food insecurity and compound humanitarian crises.¹

The situation is particularly worsening in many of the globe's most fragile contexts. An additional 1 in 5 people (21%) are now

in need in Afghanistan, the Horn of Africa, the Sahel region, South Sudan, and Yemen – with numbers doubling in Niger and Somalia – between 2021 and 2022.

Already in most operational contexts, many organisations providing food aid have had no alternative but to reduce the quantity, quality, and frequency of assistance due to already overstretched budgets as well as decreases in funding. As a result, millions of people in need are not receiving any assistance.

Key concerns

- The first grain shipments from Ukraine have been released; however, the laws of supply and demand mean it will be some time before we see the impact on prices and availability – which continue to exacerbate existing humanitarian crises where the lives of millions of children are teetering on the edge.
- Amidst skyrocketing staple food prices, a historic drought that is predicted to stretch to a fifth season is driving emergency and famine-like levels of hunger in Somalia. Nearly half of the population (over 7 million people) are grappling with hunger – and more than 2.1 million girls, boys, women, and men are on the brink of starvation, with 213,000 people already living in famine-like conditions. More than 1.5 million children under the age of 5 are acutely malnourished and at increased risk of death, and this worsening situation will only further exacerbate the suffering.
- The effects of an ongoing economic crisis, continued border conflicts, and a forecasted below average rainfall in Syria has analysts predicting that an additional 500,000 Syrians will require humanitarian assistance within the next six months – on top of the 12 million people who are already food insecure and 2.5 million living in severe food insecurity.³
- Tension continues to rise in Myanmar with concerns about how a possible scale-up in fighting could impact civilians who already bear the brunt of the conflict as they struggle with rising food prices and constrained agricultural production. It is estimated that 1 out of every 4 people (13.2 million) are living in food insecurity, and more than 1 million are facing severe hunger.⁴
- Children are not just starving but are being starved to death due to human inaction to stop conflict, climate change, and provide humanitarian funding to save lives. While there has been a pick-up in attention (from media, donors, policy makers) to the global hunger crisis, the needs continue to outpace the support. This is more evident than ever as the dangerous underfunding of the 41 global humanitarian responses has reached its largest-ever gap between requirements and funding with US\$32.9 billion still needed to meet the needs of the most vulnerable.⁵

RESPONSE GOAL: To reduce acute food insecurity and improve the resilience of 22 million of the most vulnerable people in countries experiencing growing hunger and the threat of famine

IMPACT HIGHLIGHTS

Improve access to food for affected households

- 3,601,329** People reached with cash and voucher assistance
- US\$123,993,777** Cash and voucher assistance distributed
- 813,326** Children receiving hot meals and/or dry rations through school feeding
- 7,361,458** People reached with (in-kind) food assistance

Increase access to curative and preventive quality emergency health and nutrition services

- 733,972** People reached through primary health-care support
- 329,727** Children reached through management of severe acute malnutrition (SAM) and moderate acute malnutrition (MAM)
- 18,931** Children recovered from SAM
- 42,805** Primary caregivers benefited from infant and young child feeding (IYCF) promotion and action oriented sessions and counselling

Improve access to clean water, sanitation and hygiene promotion services to mitigate water-borne diseases

- 1,479,438** People with access to clean, potable water
- 179,053** People that have participated in emergency hygiene promotion activities with appropriate supplies

Ensure protection for children, women, and vulnerable groups including psychosocial support and provision of dignity kits for reproductive age girls and women

- 117,035** People receiving psychosocial support
- 174,450** People receiving prevention messages on prevention of sexual exploitation and abuse and/or positive coping strategies

Household resilience to food insecurity and livelihoods-related shocks

- 300** Households provided with conditional cash or vouchers to procure agricultural physical assets
- 23,328** Households provided with livelihood physical agricultural assets
- 7,707** Households growing crops that are resilient to climate hazards/stresses
- 6,952** People trained in climate change resilient farming practices

Suldana, 15, and her family fled their home in Somalia as the drought took away their livestock. "The drought and famine destroyed our source of livelihoods. We were herders, but acute drought took all of them." She now has to work for her family to eat. Even though they only eat once a day, she told World Vision that 'this place is better than where we came from because people are supporting each other'.
