

HUMANITARIAN EMERGENCY AFFAIRS

Humanitarian situation in Zambia

Although Zambia remains politically stable from conflict, the humanitarian situation remains fragile due to high levels of poverty; the impact of the COVID-19 pandemic; macroeconomic instability; and exposure to climatic shocks. This has resulted in an increase in food insecurity in most districts primarily driven by shocks such as prolonged dry spells, flooding, reduced livelihood opportunities, pests, diseases, and high food prices. According to the August 2022 In-depth Vulnerability Assessment report, climate shocks and increase in food prices threatened household food security with close to 2 million people requiring food assistance in Zambia before the 2022/2023 crop marketing season.

Our Programming Approach

World Vision Zambia, through the Humanitarian and **Affairs** Emergency (HEA) department, works communities, partners, and World Vision Support Offices to deliver humanitarian interventions in areas of early preparedness, emergency response, and recovery programmes. Our overarching goal is to provide timely humanitarian assistance to the disaster-affected population through timely response for vulnerable children and their families ensuring that they receive the needed life saving support protecting them from harm during disasters or conflicts. We understand that the nature of emergencies in the country is changing. Conflicts are more vicious, complex and unpredictable. Climate change is unleashing natural disasters faster and for longer periods of time and with longer-lasting consequences for children and their families.

CAPACITY STATEMENT >> HUMANITARIAN EMERGENCY RESPONSE

HEA has conducted capacity building initiatives for front line staff, government and the District Disaster Management Committees equipping them to respond to humanitarian emergencies. Additionally, World Vision Zambia maintains a prepositioned relief stock to enable early action when disaster strikes. This support intervention builds community resilience to mitigate and respond to future shocks.

REFUGEE RESPONSE

World Vision Zambia has been supporting the refugee situation in Zambia since early 2000 starting with Kala and Mwange Refugee Camps in Kawambwa and Mporokoso Districts. We have provided support through the provision of basic protection services such as food distribution, shelter, water, sanitation, health care and maintenance.

From 2017 to date, World Vision Zambia has been working in all three refugee settlements (Maheba, Mayukwayukwa, Mantapala) and the transit centers supporting water, sanitation, and hygiene interventions as well as distribution of core relief items in Mantapala only.

In Partnership with UNICEF

1,900

Rehabilitated water point in Meheba, 2022

EDUCATION SUPPORT

We responded to the education needs of learners affected by the prolonged closure of schools due to the COVID-19 pandemic. World Vision Zambia supported the Ministry of Education in implementing COVID-19 prevention protocols in schools.

Further, 8 districts were supported with promoting education outcomes in Muchinga and Southern provinces under the Global Partnership for Education.

In partnership with the UNHCR we supported the construction of education infrastructure. including dormitories and latrines in Meheba and Mayukwayukwa.

Children Screened 18,842

Children Received Treatment

ULTRA POOR GRADUATION (UPG) SUPPORTING DURABLE SOLUTION FOR REFUGEES AND HOST COMMUNITIES

Reaching ultra-poor refugees and host communities with social protection, livelihood promotion, financial inclusion, and social empowerment.

The intervention is being delivered through World Vision's Empowered World View model focusing on mindset change, capacity building and empowerment to refugees and former refugees in Meheba. UPG Producer Groups were formed in Meheba with coaches oriented and trained to provide support and mentorship to project participants.

The UPG participants received Consumption Support Fund as well as livelihood training in livestock farming, fish farming, chicken rearing, horticulture and small/medium businesses management. In addition, financial literacy training.
