

Overview of South Kordofan State Programme

Where We Work

Estimated Population

Total: **1,225,072**

659,089
adults

565,983
children

Background

World Vision started operations in South Kordofan state in 2018, as part of its expansion strategy to go to where the need is the greatest.

World Vision has operations in 14 out of the 17 localities, directly reaching the most vulnerable children through Water, Sanitation and Hygiene (WASH), Health and Nutrition, Food Security and Livelihoods, including Food Assistance, and Child Protection interventions.

Our interventions target internally displaced populations, returnees, refugees, as well as vulnerable residents.

By 2025, World Vision hopes to have directly reached 440,000 of the most vulnerable children, nearly 77% of the total number of children in the state.

OVERVIEW OF IMPACT IN 2022*

**figures rounded off*

19,000
metric tons of food
commodities distributed

US\$ 2.6 M
distributed through
cash transfers

156,000
people reached with
food and cash assistance

19,200
people received Food
For Asset (FFA) support

43,000
people received health
support

15,500
people reached with
WASH support

Sector overview

Health and Nutrition

Our interventions mainly focus on:

- Rehabilitation of health facilities providing primary health care services
- Providing health referral services targeting refugees
- Screening for, and management of malnutrition through the Outpatient Therapeutic Programs (OTPs) and Targeted Supplementary Feeding Programs (TFSPs)
- Community Management of Acute Malnutrition (CMAM) and referrals to health facilities
- Capacity building of community and Ministry of Health staff on screening and management of malnutrition

Food Security and Livelihoods

Our interventions mainly focus on:

- Provision of food assistance in the form of general food distribution targeting vulnerable internally displaced persons, refugees and host communities.
- School meal programmes targeting vulnerable children.
- Distribution of agricultural inputs including seeds and small implements.
- Equipping farmers with training and skills.

Protection

Our interventions mainly focus on:

- Improving access to good quality primary education for refugees and IDPs
- Promoting inclusive education by providing support to school feeding and supporting families in gardening
- Sexual and gender-based violence prevention and awareness
- Women, girls and child right and service advocacy reaching 20,700 people
- Capacity building of community and government on Prevention of sexual exploitation and abuse

Water, Sanitation and Hygiene

Our interventions mainly focus on:

- Increasing access to water infrastructure and sanitation facilities
- Rehabilitation of Hafirs (water pans), broken water hand pumps and boreholes
- Upgrading of boreholes to solar-powered systems
- Providing sustainable cost-recovery water supply systems
- Construction of Ventilated Improved Pit (VIP) latrines in schools and health facilities
- Hygiene promotion and education

COLLABORATIONS AND PARTNERSHIPS

We coordinate closely with the Sudanese government through relevant line ministries such as the State level Ministry of Health, and the Humanitarian Aid Commission (HAC). We are continuously engaging with various local NGO partners in the state on planning and designing of projects, and implementation of our day-to-day activities across the different sectors. This ranges from facilitating community mobilization and disseminating messages to communities about the programs being implemented, conducting training and monitoring of field activities.

Our goal is to ensure that we are building the capacity of local partners to ensure project activities run smoothly even after project phase out.
