

# Burkina Faso

Capacity Statement | 2024

## Who we are

World Vision is a global Christian humanitarian organisation dedicated to working with children, families, and their communities to reach their full potential by addressing the root causes of poverty and injustice. World Vision serves all people, regardless of religion, race, ethnicity or gender. World Vision initiated operations in Burkina Faso in 2021 to respond to rising humanitarian needs, aiming to reduce suffering and strengthen resilience among women, men, boys, and girls. Current programs in Burkina Faso span five regions, including Boucle du Mouhoun, Nord, Sahel, Centre, and Centre-Nord, which cover 21 communes. Since its inception, World Vision assisted **162,781 adults (69,892 men and 92,889 women) and 241,232 children (122,642 boys and 118,590 girls)** with food security, livelihoods, nutrition, health, WASH, protection, mental health, psychosocial support, cash/voucher transfers, and nonfood item distributions. Programs are funded by the Global Alliance for Vaccines and Immunization (GAVI), Aktion Deutschland Hilft (ADH), Dutch Relief Alliance, World Food Program (WFP), U.N. Population Fund, U.N. High Commissioner for Refugees (UNHCR), Visser Response Fund, and World Vision donors.

As a member of the World Vision Partnership, World Vision Burkina Faso draws on a roster of national and international humanitarian technical experts, digital systems and solutions like the Last Mile Mobile Solution that comply with international and humanitarian standards and national and international flexible funding solutions.

## Our response goal & objectives

« Save lives, reduce human suffering strengthen the resilience of **1 000 000 people** »

Increase access to basic **water, sanitation, and hygiene services**

Increase access to **food and strengthen livelihoods**

Improve the **psychosocial wellbeing of people, especially children**

Increase access to **health care through community and primary health care strengthening**

Increase **opportunities for youth empowerment**

Develop local **sustainable partnerships**

# Where we work

We are implementing programs in 5 of Burkina Faso's 13 regions, and our activities are carried out in 26 communes.

## Our Work

### Child Protection

Our Child protection services are geared towards strengthening and formal and informal mechanisms to work effectively together to protect boys and girls from GBV, especially the most vulnerable, and Improve capacity of religious leaders to act and influence socio-cultural norms to improve the well-being of children. In FY22/23, 152,379 people trained on child protection issues by religious and community leaders, 12,198 children participated in child-friendly space activities.

### Water, Sanitation & Hygiene

World Vision aims to increase basic access to WASH services in communities. In 2022/2023, we focused on providing access to WASH for households, health facilities, and schools, coupled with promoting social behavioral change in hygiene and proper waste management practice. Our WASH program approach includes rehabilitating water sources, constructing new boreholes, and creating, training, and equipping community WASH committees. World Vision also distributes hygiene kits and WASH supplies and organizes community awareness campaigns for improved hygiene and sanitation practices with a special focus on children, who are important agents of change in their communities. During 2022/23, about 120,376 people were reached with WASH interventions. We drilled 42 boreholes, providing access to clean water for 132,376 people, including 19,987 children and assisted 38,163 people, including 16,888 children, with access to appropriate sanitary facilities. In addition, 49,837 households were trained on good hygiene practices and water treatment techniques.

### Food Security & Livelihoods

Our goal is to increase access to food and strengthen livelihoods in communities. We provide food aid in cash and/or in-kind to the most vulnerable communities, meeting the immediate needs of children and families by increasing household access to food. Our food security and resilience program has reached more than 4,000 vulnerable households through interventions that focus on the root causes of food insecurity. In 2022/23, more than 19,705 people in 2,815 vulnerable households received food assistance in cash, 747 vulnerable households received food vouchers, and 623 young people and women from vulnerable households were trained in various trades. Each young person received a startup kit to help launch income-generating activities.

## Health & Nutrition

Our health and nutrition programs aim to reduce maternal and child mortality through improved health and nutrition practices. World Vision works to ensure that mothers, newborns, and children under five have access to quality essential healthcare services while strengthening the capacity of health workers to provide community and primary healthcare, including sexual and reproductive health services, immunizations, and management of malnutrition. We also have built community capacity in prevention, early detection, and referral of malnutrition cases to infant and young-child feeding (IYCF) support groups through nutrition education sessions, which promote behavioral change and help caregivers adopt good food and nutrition practices. In 2022/23, 25,728 children ages 6 to 23 months, including 12,556 boys and 13,172 girls, received nutritional assistance through the distribution of small quantities of Lipid Nutrient Supplement (LNS), while 33,150 individuals, including 32,143 women and 1,007 men, learned proper IYCF practices. We detected malnourishment in 1,725 children (with moderate acute malnutrition and with severe acute malnutrition) who were referred to health centers for medical care. In addition, we trained 130 community-based health workers on the LNS strategy. We provided vaccination to 4,464 zero dose and under vaccinated children including (2,353 girls and 2,111 boys).

## Women and Youth Empowerment

Our initiatives are built on a theory of positive youth development and empower women and young people to be active agents of change for themselves and their communities. Our women and youth programs recognize the vital role of long-term developmental relationships that support women and young people and improve life skills, outcomes, and functional literacy for individual women and young people, and the groups they are involved with. World Vision works with local partners and champions to build community commitment and ensure sustainability by engaging local partners and empowering champions with the competencies needed to effectively work with women and young people. At present, World Vision is supporting 40 women- and youth-run groups and 3,000 individual entrepreneurial ventures, leading to a significant increase in income among women and youth entrepreneurs. These interventions are structured around the market-systems approach to help the government develop a pro-business support structure within the districts/communes that are interconnected. Our goal is to ensure communities are poised to meet the needs of on-farm and off-farm businesses by addressing intrinsic weaknesses in high-end value chains. The interventions reached 6,119 women and youth in the previous two phases.

## Evidence of impact \*

### People reached : 404,013 people

\* for fiscal year 2022/2023

## Response Funding

### Total amount of funding received within the last 2 fiscal years :

One Seed Grant has multiplied to 17 projects totaling \$12.1 million in less than three years.

## Our differentiators

### Technical leadership

We have over 70 years of experience and a pool of technical experts in humanitarian actions with industry-accepted practices to support the technical sectors development and emergency response needs. We strives for the highest program quality through the application of technical best practices, pursuit of global humanitarian standards, community appropriateness, continuous innovation, and rigorous evaluation.

### Broad, Diverse Partnership

We recognized the importance of collaboration to ensure that the response goals are met. We leveraged on our existing partnerships with key stakeholders, including government corporations and other key agencies and groups at the soum, provincial and national levels, while maintaining engagement with UN agencies, other INGOs and different child-focused groups. We are trusted, strategic partner to hundreds of partners including governments, CSOs, faith communities, faith-based organizations, businesses, academia, in West Africa and around the world.

### Comprehensiveness

Our groundbreaking experience in health and nutrition, economic development, education, water, sanitation, and hygiene enables us to provide emergency services and help develop and implement long-term, sustainable solutions tailor-made to the specific situation and needs of the community in crisis.

### Long-term commitment for lasting change

World Vision sees the value of a sustained presence in country. Therefore, WV often makes a durable commitment to remain in and after the crisis to allow for deeper, transformative positive change, often in close partnership with local and national authorities.

### Engaging faith in responses

World Vision can draw strength and service from the inter-faith community in providing life-saving support to those most affected. WV's experience shows engagement between faith communities and more traditional relief actors yields strong impact.

## Our value proposition

World Vision is committed to deepening the impact on children in the most fragile environments using the World Vision Fragile Context Programming Approach (FCPA). The FCPA aims to enhance adaptive programming, by meeting immediate survival needs while addressing the systemic root causes and drivers of conflict, fragility and vulnerability in evolving contexts.

We are capable of responding quickly, collaboratively, and holistically to virtually any emergency. Thus, our response work in partnership with local, national and international actors includes innovative, multi-sectoral approaches and evidence-based programmes.

Our emergency responses focused on provision of direct support to the affected people including distribution of food, cash, child kit and hygiene kit.

### Our Global Reach

More than 70 years of experience serving the world's most vulnerable children and communities

Our presence in more than 100 countries

En 2021, we supported more than 200 million children and reached 30 million people with humanitarian emergency assistance in 52 countries

With the work we do, we contribute to the fulfillment of the following SDG :

## Key Donors and Partners

| Impact donors                | Impact partners           |
|------------------------------|---------------------------|
| Aktion Deutschland Hilft     | Government                |
| Dutch Relief Alliance        | Local NGO's               |
| GAVI                         | INGO's                    |
| UNFPA                        | Private Institutions      |
| UNHCR                        | Faith-based Organizations |
| Visser Response Fund         |                           |
| WFP                          |                           |
| World Vision support offices |                           |

Notre vision pour chaque enfant, la vie dans toute sa plénitude.  
Notre prière pour chaque coeur, la volonté d'y parvenir.
