

Grasscutters, clinics and spider plants

The multi-sectoral nature of scaling up production and utilization of nutritious foods: making it happen

SIDE EVENT

At CFS 43

Red Room

Building A, Floor 1

Wednesday 19
October 2016
18:00h – 19:30h

Achieving good nutrition through sustainable diets requires inter-sectoral action at national and sub-national levels. This event will explore how to achieve this. Concrete examples will be presented of tools and approaches that have catalyzed multi-sectoral collaboration for nutrition in **Ghana, Kenya, Rwanda** and **Uganda**. It will also illustrate how links with ongoing initiatives such as the **SUN Movement**, strengthening capacity through **FAO**, and collaboration with national governments are important. Featured panelists will share their experiences to kick off a lively debate on using multi-sectoral coordinated mechanisms to scale up production and utilisation of nutritious foods.

Moderator:

Boitshepo Bibi Giyose – Senior Nutrition Officer for Policy and Programmes, Nutrition Division, FAO

Panelists:

Jean-Marc Faures – Food and Agriculture Organisation

Victor Wasike – Bioversity International, Biodiversity for Food and Nutrition Project

Miriam Yiannakis – World Vision

Representative – Scaling Up Nutrition Movement

Maarten De Groot – Government of Canada

Questions and discussion
