

Key messages

- Internally Displaced Persons (IDPs):** On 4 August 2018, inter-communal clashes broke out in Jijiga (Somali region), and quickly spread to the neighbouring cities of Babile, Degehabur, Gode, Kebri Dehar and Warder, displacing 141,400 people. Following the conflict, Oromia and Tigray regions have reported an influx of new IDPs from the Somali region.
- The threat of diseases:** Outbreaks of Acute Watery Diarrhea (AWD), measles and dengue fever, pose public health problems. There have been increased cases of AWD in Afar region. In 2018, a total of 1,455 cases were reported in Afar, Dire Dawa, Somali and Tigray regions. Of these, there were 18 deaths. In June 2018, there were 52 dengue fever cases reported in the flood affected Gode zone in the Somali region.
- Flood alert:** In August 2018, the National Meteorology Agency (NMA) issued the mid-season weather analysis for the 2018 *kiremt* season focusing on the June & July climate assessment and a forecast for the remaining months (August & September) 2018. According to NMA predictions, some parts of the country will experience heavy rainfall with thunderstorm showers, while other parts of the will receive near normal to above normal rainfall.
- Food security outlook:** Despite a dry spell from mid-July to early August across most parts of Amhara and Oromia regions, the Kiremt (June-September) rainfall is expected to boost overall average main crop production in most parts of the country during the November harvests. This will boost food availability in most households and ease the price of stable food particularly in portions of southern Tigray, northeastern Amhara, and eastern Oromia.

Gedeo - West Guji Zones

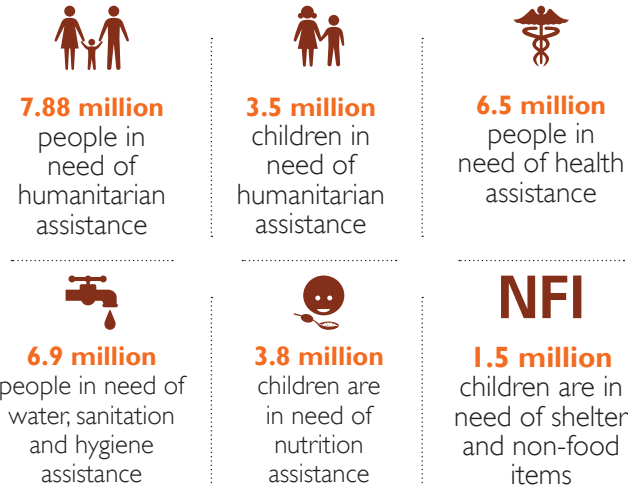

July 2018

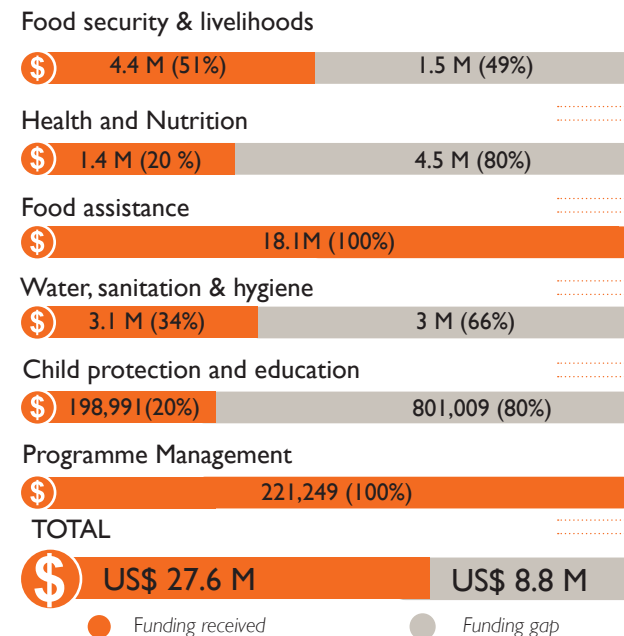

Gaps and needs

- Project proposal submitted:** Even though some funding has been secured in the last month, funding in sectors such as education, protection and health is not enough. Due to the need in the education sector for IDPs in Gedio-West Guji, World Vision submitted a proposal worth US\$320,000 to HRF/OCHA in order to meet the identified gaps in education such as provision of learning materials for children.
- Focus on recovery:** The need for recovery response is now critical in order to support the IDPs to recover from the conflict and rebuild their livelihoods.
