

Global Week of Action Pledge

Call on your leader to

- Ensure that all children, regardless of where they live, have access to nutritious food and essential health services
- Prioritise reaching children who are unseen, uncounted and invisible so that they don't miss out on life-saving health care
- Address the problem of missing data for vulnerable groups by establishing routine data collection systems locally and nationally which measure the health gap.
- Advocate for increased funding allocated to the Health sector especially to tier 3 hospitals (Community Level Facilities) where child morbidity is more prevalent.
- World Vision advocates for an additional KShs.182 billion (US\$2.1 billion) to the health sector as per the 15% benchmark of Abuja Declaration (2001).
