

COMMUNITY ELIMINATION OF MOTHER TO CHILD TRANSMISSION (EMTCT) OF HIV APPROACH

Models of intervention

Channels of Hope model—
Stigma and discrimination

Testing and linkage to care model—
Community

Timely and targeted counseling model—
Identification and linkage of HIV positive mothers into EMTCT cascade

Expanded prevention model –
Empowerment of youth

Reduced incidence of HIV among women of reproductive age, exposed children and improved survival of HIV positive mothers and children

HIV and workplace
World Vision Uganda has a functional HIV and workplace policy that strives to create an environment free from prejudice, stigma and discrimination for those living with HIV and promotes HIV prevention.
