## Executive summary

---

On the 24th and 25th of February 2015, experts in risk and well-being systems, along with key decision makers, met in Nairobi to explore ways to strengthen the resilience of well-being systems of pastoral, agro-pastoral and peri-urban communities in Somalia over the next three to five years.

The meeting was hosted by the Somalia Resilience Program (SomReP) and the Building Resilient Communities in Somalia (BRCiS) consortia, with assistance from the OECD and the active participation of the Ministries of the Federal Government of Somalia, NGOs, civil society, the Red Cross movement, donors and the United Nations. The analysis was structured around the OECD's resilience systems analysis methodology, drawing on the expertise and knowledge of participants, to develop a concrete set of actions – a 'roadmap for resilience'. The meeting was generously supported by the European Union, FAO, WFP and UNICEF.

The analysis generated innovative approaches to strengthening the resilience of the target communities and a shared understanding of both the primary risks and the intrinsic stresses within those communities' systems for well-being. Participants identified nine priority risks including drought, seasonal flooding, livestock disease, human disease and epidemics, the collapse of agricultural markets, conflict and instability, protection issues, and market instability, including price shocks and unfavourable terms of trade. While there was a perception that the risk landscape for Somalia would most likely improve over the next three to five years, there was a sense that this improvement was, nevertheless, fragile and subject to short term interruptions over that time. Key priorities to strengthen the resilience of well-being systems in Somalia included:

- Strengthening youth education and technical training programmes
- Improving the value chain within key sectors, including fisheries and value-added export processes
- Developing a national resource management policy
- Strengthening government revenues
- Extending community-level early-warning systems
- Building basic social infrastructure services
- Shifting from humanitarian assistance to social safety nets and long-term development financing

The **roadmap to strengthen resilience** (starting page 20) shows how different actions to boost resilience in Somalia should be implemented at different layers of society. It necessitates the co-ordinated commitment of a wide range of actors, including the government, private sector, UN agencies and communities themselves, with the commitment of donors. The resilience roadmap will inform a number of key processes in the coming months, including informing planning and strategy processes for the Government of Somalia, the UN, NGOs and civil society. The analysis will also be utilised for the Donor Group meeting for Somalia, scheduled for April 2015 and the OECD's high level mission for Somalia, led by the Chair of the Donor Assistance Committee, at the end of March 2015.

## Five steps for the Resilience System Analysis in Somalia

The resilience systems analysis for Somalia set out to help different groups of actors, both Somalis and the international community, determine how to strengthen the resilience of pastoral, agro-pastoral and peri-urban communities in Somalia. The analysis focused on identifying what resources and capacities communities need to absorb, adapt and transform in the face of a broad range of risks, stresses and uncertainty.

To do this, experts in risk, experts in systems and key decision makers from the Somali Government, NGOs, civil society, the United Nations, Red Cross movement and donors worked together for two days to:

- Share a vision of major risks and their impact on systems for well-being
- Develop a road map to boost the resilience of the well-being systems of pastoral, agro-pastoral and peri-urban communities in Somalia over the next three to five years

The workshop focused on the following scoping question:

<b>Resilience of what?</b>	<b>Well-being system</b>
<b>Resilience for whom?</b>	<b>Pastoral , agro-pastoral and peri-urban communities in Somalia</b>
<b>Resilience to which shocks?</b>	<b>Natural, economic and political</b>
<b>Resilience over what timeframe?</b>	<b>Over the next three to five years</b>

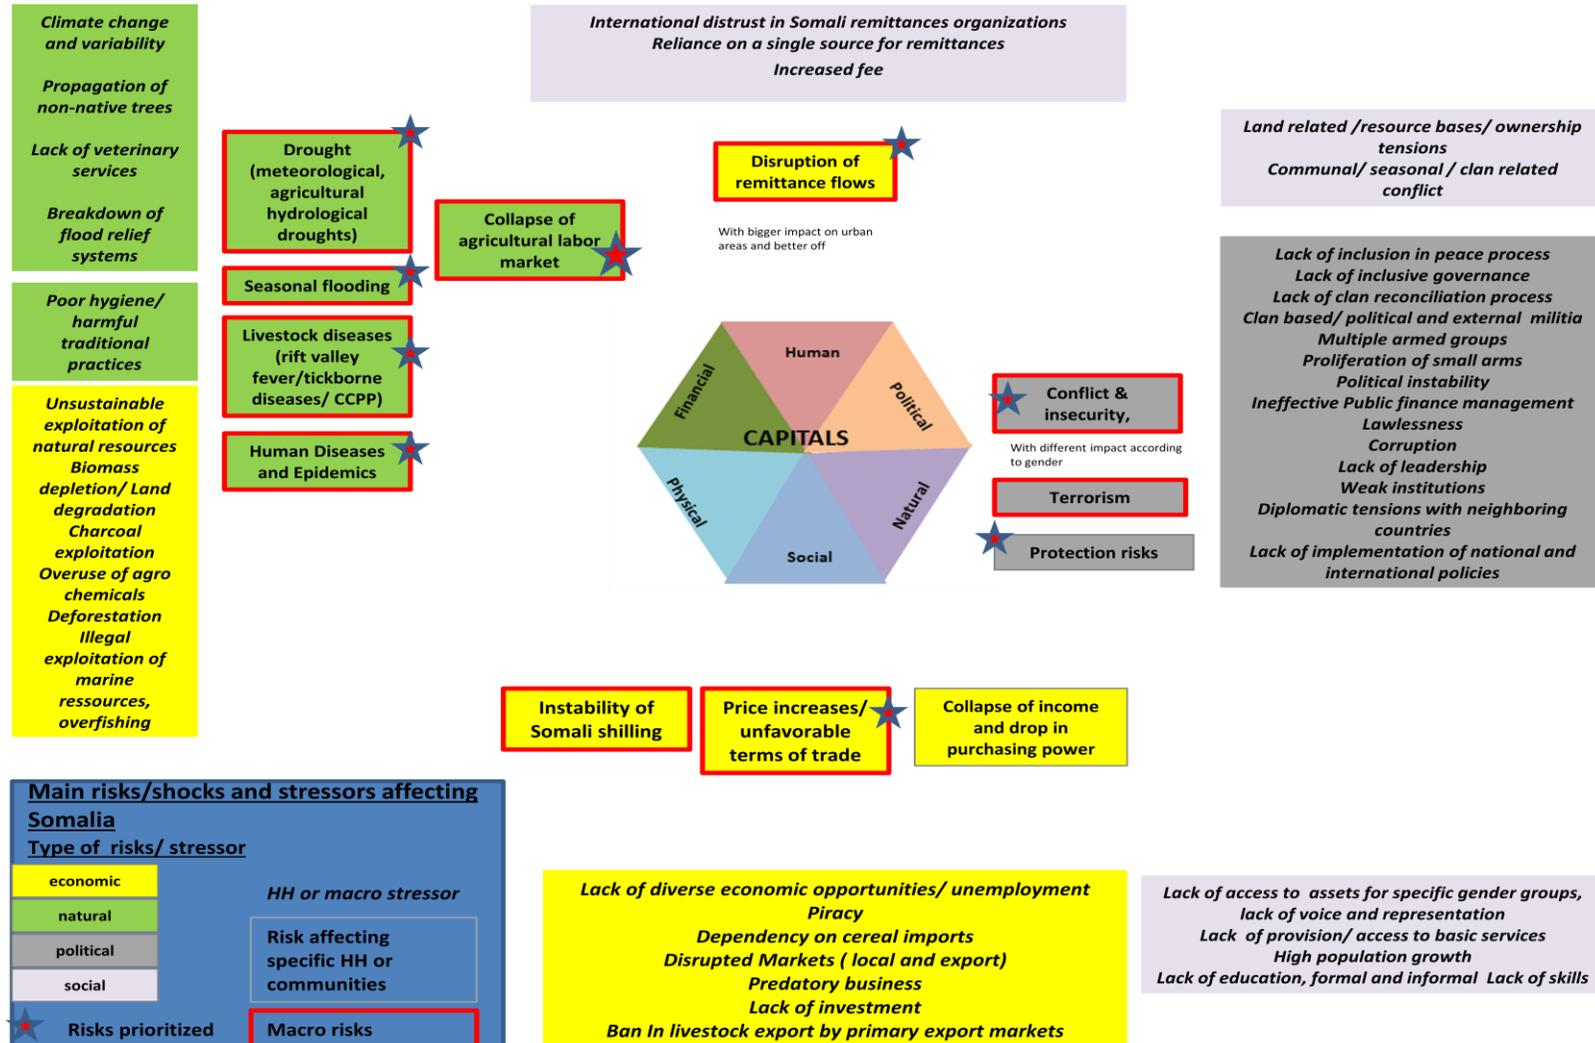

The workshop followed the 5 steps described in the figure below. This report encompasses the various products which participants came up with at each step of the process.

## Mapping risks and stresses affecting well-being systems in Somalia

To support resilience, we need to understand the risks that pastoral, agro-pastoral and peri-urban communities in Somalia are facing, and why these communities are either able, or unable, to deal with those risks, i.e. where the well-being system of these communities is weak, and where it is strong. We then use this information to learn from areas where systems are strong (where it has capacity) and where it is weak (where existing capacities cannot counter the underlying stressors).

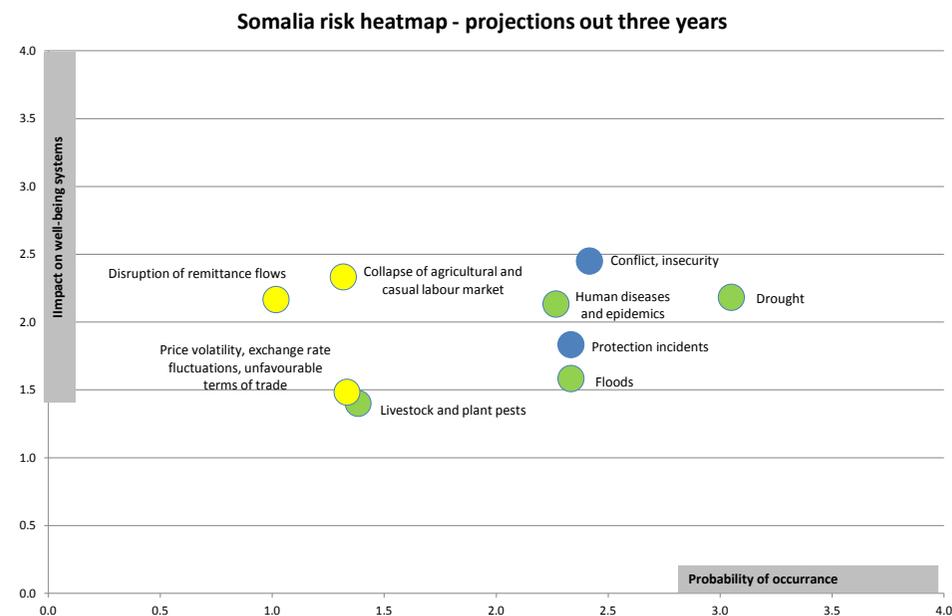

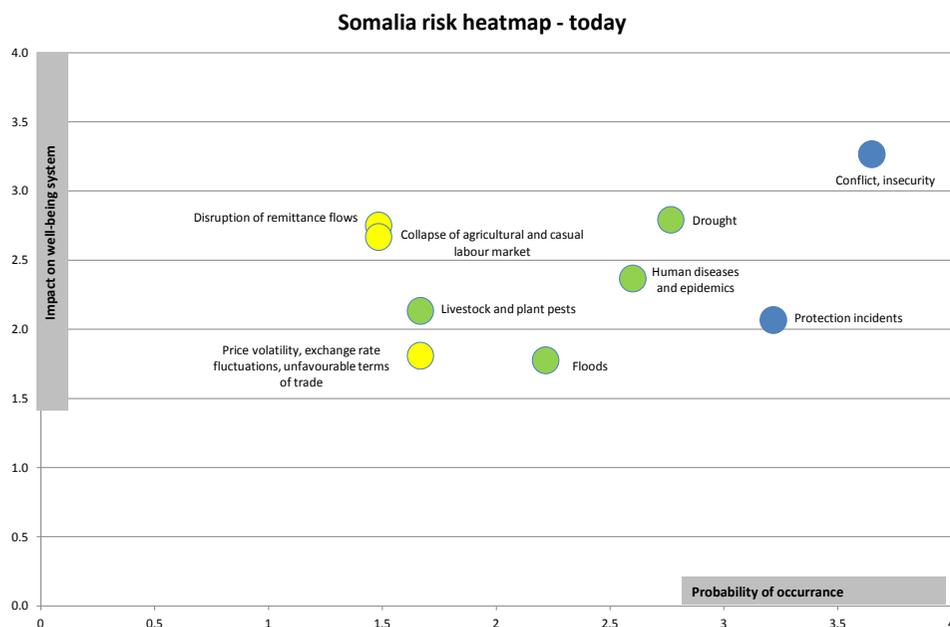

Participants agreed on the following risk landscape and underlying stressors for the target communities in Somalia, based on nine key natural, economic and geo-political risks (marked with a star):

## Reflecting on the severity of risks, both today and in three to five years' time

It is critical to understand the probability and impact that the nine risks (identified in the previous step) will have on the well-being of pastoral, agro-pastoral and peri-urban communities in Somalia – both today and in three to five years' time (the scoping period for this analysis). The evolution of the risk landscape is critical – will some risks become more likely? Will they affect the well-being of communities more or less? This part of the analysis ensures that we focus on the highest priority risks when deciding where and how to boost resilience.

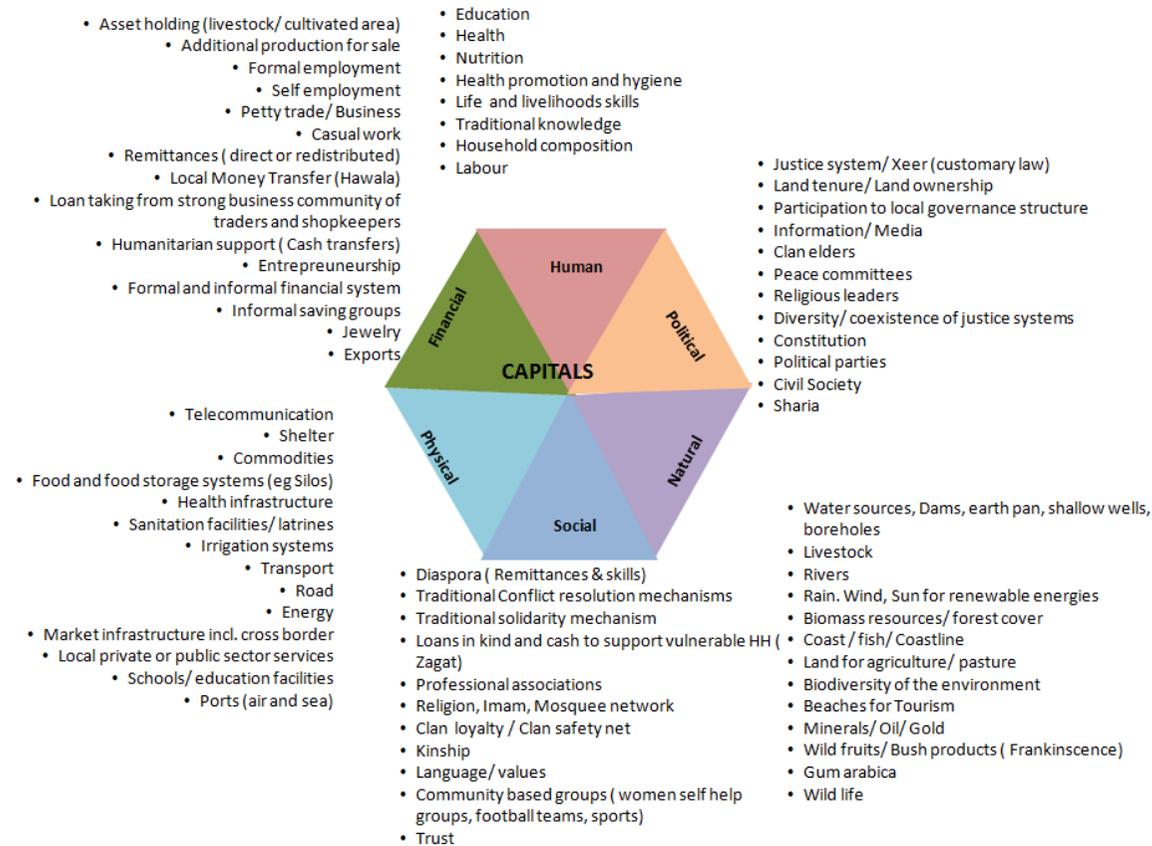

Interestingly, participants in this analysis agreed that the risk landscape – the risks faced by pastoral, agro-pastoral and peri-urban communities in Somalia – would improve over the next three to five years. However, there was also agreement that this improvement was fragile, heavily dependent on the continuation of programming to build resilience in Somalia, and on the continued improvement of key factors such as inclusive governance and the security situation. Some participants also reflected on how, while the overall situation may improve, there will likely be “bumps” on the way; times when overall risks may increase. The risk landscape today, and in three to five years' time, is shown below:

## Determining the key assets of the well-being system

The system is made up of different kinds of assets; assets that communities need to ensure their overall well-being. The system in this analysis is made up of six inter-linked groups of assets: human capital, financial capital, natural capital, physical capital, social capital and political capital.

The level, quality and sustainable access to all of these six groups of assets is essential to ensure that the well-being system is resilient in the face of future shocks. The following graphic shows the key assets for continued well-being in Somalia, broken down by capital group:

## Stakeholders influencing the quality, quantity or access to assets

The influence and the power of various stakeholders can have a major impact on communities, by either facilitating (positive impact), or preventing (negative impact), access to assets that are critical for their continued well-being.

The following analysis illustrates the stakeholders influencing the well-being system of the pastoral, agro-pastoral and peri-urban communities in Somalia:

- 1 Risks • Identification of key risks
- 2 Assets • Determining assets per capital and reflecting on assets characteristics
- 3 Power • Analysis of stakeholders and power influencing access to assets
- 4 Capacities • Reviewing existing capacities (internal and external)
- 5 GAPS • Analysing the gaps and support needed and selecting priorities to draft a roadmap

### Power analysis for pastoral communities

**Power analysis for agro-pastoral communities**

**Power analysis for peri-urban communities**

## A roadmap to strengthen resilience in Somalia

At this stage, we have a good understanding of the **risks**, the **stressors** and the **key assets** in the **well-being system** for pastoralist, agro-pastoralist and peri-urban communities in Somalia; as well as the ways in which these key assets are **resilient** (or not resilient) to the risks they face.

The next step is to decide what actions need to be taken to boost the resilience of the well-being system for pastoralist, agro-pastoralist and peri-urban communities in Somalia. This involves increasing the capacity of the system to absorb shocks; adapting the system so that it is less exposed to shocks and can utilise opportunities; and/or transform the system.

Actions to absorb, adapt and transform the well-being system need to happen at different layers of society. Stakeholders and actions at **all layers of society** – globally and in the East Africa region, nationally, regionally and at the district, community and household levels – already influence the well-being of communities. In addition, it is important to note that the different layers of society – and the system itself – are inter-linked. Therefore, we will need to **work at every layer of society** if we are to ensure that pastoralist, agro-pastoralist and peri-urban communities are resilient to the risks they face. Actions at one layer of society, without corresponding actions at other layers of society, will not be sufficient to boost the resilience of these communities.

Accordingly, the roadmap to strengthen the resilience of pastoralist, agro-pastoralist and peri-urban communities in Somalia is presented below, by layer of society. Different Somali and international actors work at different layers of society, and will therefore be able to integrate these actions into their upcoming policies and programming – either by adapting or reinforcing existing initiatives, or by developing new policies and initiatives. The roadmap is too large to fit on one page, instead it is presented with one layer of society per page. The overall roadmap should look like:

Policies, Programmes and Activities to boost following capacities:			
Layer of Society	Absorptive Capacity	Adaptive Capacity	Transformative Capacity
<b>Global/East Africa</b>			
<b>National</b>			
<b>District/Regional</b>			
<b>Community</b>			
<b>Household</b>			

In addition, it is important to note that this roadmap is designed to supplement – not replace – existing policies, programmes and activities in Somalia. Earlier in the analysis, participants agreed that the risk landscape in Somalia would improve over the next three to five years. They also agreed that this improvement was conditional on existing policies, programmes and activities continuing in Somalia. Therefore the resilience roadmap presented below contains policy, programme and activities that should be in addition to – or modifications of – existing programming.

A. Policies, programmes and activities at **global/East Africa region** levels to boost three types of resilience-strengthening capacities

Absorptive Capacity	Adaptive Capacity	Transformative Capacity
<ul style="list-style-type: none"> <li>• Lobby for international goodwill for aid to Somalia</li> <li>• Lobby for suspending sanctions on Hawala (also affects UN and NGO money transfers, and transfers to Somalis in neighbouring countries, and thus also neighbouring economies)</li> <li>• Advocate for policies that support cross-border interactions with neighbouring countries and diaspora</li> <li>• Strengthen information management and accessibility at national and regional levels</li> </ul>	<ul style="list-style-type: none"> <li>• Develop the access to information on market prices</li> <li>• Develop a policy and regulatory framework for animal health and trade</li> <li>• Encourage public-private partnerships with relevant enterprises</li> <li>• Create a positive policy environment for efficient and effective remittance flows</li> <li>• Promote and streamline diaspora engagement globally and locally</li> </ul>	<ul style="list-style-type: none"> <li>• Ensure national and international projects and programmes take into account local traditional knowledge and should be context specific, applying “Do No Harm” principles</li> <li>• Reduce clan antagonisms that have existed for the past 25 years, by encouraging internationally led peace and reconciliation efforts between clans/political actors, similar to South Africa</li> <li>• Support trans-boundary water resource agreements with Somalia’s neighbouring countries.</li> <li>• Develop cross-border migration agreements</li> <li>• Foster livestock markets and export linkages</li> <li>• Explore non-traditional markets</li> <li>• Develop media laws at a national and regional level, including protection for the freedom of expression and for media actors</li> <li>• Promote Somali nationalism to the diaspora</li> <li>• Re- establish regulated cross border with Kenya and Djibouti</li> </ul>

## B. Policies, programmes and activities at **national level** to boost three types of resilience-strengthening capacities

Absorptive Capacity	Adaptive Capacity	Transformative Capacity
<ul style="list-style-type: none"> <li>• Provide mobile schools to the large Somali nomadic population</li> <li>• Develop national library services</li> <li>• Establish effective early-warning systems</li> <li>• Ensure background checks for immigrants</li> <li>• Strengthen diaspora capacities for advocacy and skill-sharing</li> <li>• Protect and formalise community custody of land</li> <li>• Expand and reform the land title system</li> <li>• Promote internal and external civil society coordination to combat duplication and fragmentation</li> <li>• Finalise and ratify the constitution</li> <li>• Develop a leadership competency framework</li> <li>• Strengthen representative politics to ensure gender and regional interests are represented</li> <li>• Strengthen government revenues and capacities</li> <li>• Develop an infrastructure plan to prioritize key transport corridors</li> </ul>	<ul style="list-style-type: none"> <li>• Establish systems to better link training with markets</li> <li>• Ensure vocational training is certified by government</li> <li>• Invest in youth training and employment and business opportunities</li> <li>• Rebalance and link humanitarian aid and development, working through the federal government.</li> <li>• Humanitarian safety nets should be delivered through the new government and all humanitarian aid should support resilience</li> <li>• Encourage the revival of the fishing industry</li> <li>• Develop a system to track money to alleviate fears of money being diverted to terrorism</li> <li>• Zahkat - develop regulations to collect and channel contributions</li> <li>• Further develop export markets and encourage foreign investment</li> <li>• Ensure constitutional provisions strengthen the participation of interest groups and provide legal recognition and inclusion in decision making</li> <li>• Develop a financial regulatory framework to assist with money transfers</li> <li>• Develop a 'solidarity fund': remittances as an ad hoc system of funding – needs to work for social justice; focus and streamline some of the remittances in favour of public funding, infrastructure and development</li> <li>• Put in place flood mitigation measures</li> <li>• Encourage agricultural extension services, rangeland management regimes, as well as policies for livestock insurance, fish development, timber, animal health and trade</li> <li>• Develop value added processes for the fishing industry including processing factories</li> <li>• Support seed systems, livestock marketing associations and grazing reserves for dry seasons</li> <li>• Invest in water harvesting infrastructure</li> <li>• Formally recognise elder-led customary decision making</li> <li>• Create civil society frameworks</li> <li>• Align national legislation with the constitution</li> <li>• Strengthen civic education</li> <li>• Integrate government systems at national, district and local levels</li> <li>• Emphasise conflict sensitive programming through formal, traditional and external (bilateral and multilateral) resource distribution mechanisms</li> <li>• Review, finalise and ratify the constitution</li> <li>• Encourage sanitation and hygiene training for children in public schools</li> </ul>	<ul style="list-style-type: none"> <li>• Ensure curriculum is relevant to the needs of local communities and country, continue efforts to unify the curriculum</li> <li>• Enforce education policies and ensure their implementation, particular with regard to gender-sensitive approaches</li> <li>• Develop orientation programs for the population on traditional knowledge</li> <li>• Clarify land ownership and land use law, including the role of women, and enforce it</li> <li>• Develop a policy on investment groups and financial regulation, helping develop an inclusive domestic banking sector (including KAH)</li> <li>• Develop a system of regulation for Quat – especially the hours of use</li> <li>• Set a minimum wage</li> <li>• Establish effectively animal disease control and policy</li> <li>• Formalise and codify the traditional justice system</li> <li>• Develop policy frameworks for sustainable natural resource management</li> <li>• Reform and strengthen the links between formal and traditional governance systems</li> <li>• Implement the ratified constitution</li> <li>• Introduce a formal title-deed system</li> <li>• Enforce range management</li> <li>• Legalise and fully integrate local governance with increased accountability</li> <li>• Develop a mature political party system</li> <li>• Promote mission and values-driven civil society organisations</li> <li>• Renegotiate the position and influence of civil society with the state</li> <li>• Develop a leadership and competency framework for politicians to promote integrity</li> <li>• Expand and develop existing ports to accept larger ships</li> <li>• Subsidize or promote transport networks</li> </ul>

C. Policies, programmes and activities at **regional/district level** to boost three types of resilience-strengthening capacities

Absorptive Capacity	Adaptive Capacity	Transformative Capacity
<ul style="list-style-type: none"> <li>• Put in place flood mitigation measures</li> <li>• Ensure civil society is integrating diverse groups and not exacerbating community divisions</li> <li>• Strengthen the representation of district and local issues at the national government level</li> <li>• Strengthen civil society accountability</li> <li>• Ensure veterinary clinics and services are well equipped</li> </ul>	<ul style="list-style-type: none"> <li>• Strengthen coordination and information sharing between humanitarian assistance and development and NGOs and Government and UN and donors</li> <li>• Encourage better cooperation between different education providers (Government, UN, private-public partnerships, INGOs and local communities)</li> <li>• Improve community resilience in nutrition e.g. through nutrition education in schools</li> <li>• Provide mobile schooling for nomadic populations</li> <li>• Invest in value chain development at national, district and local levels including storage, processing, transport, marketing and branding for a range of agro-industries including – e.g. pirate tuna, hide and skin, tuna, bananas, live animals, milk, fruit, frankincense, fodder</li> <li>• Improve strategic water resource development, water harvesting infrastructure, water treatment solid waste management , sewage treatment</li> <li>• Improve water sources including on rangelands</li> <li>• Support inter-clan reconciliation activities (locally led)</li> <li>• Encourage anti-indoctrination campaigns by religious leaders to counter extremism</li> <li>• Supervise Islamic education &amp; develop curricula</li> <li>• Increase diaspora outreach programs and support diaspora liaison offices</li> <li>• Develop reintegration and job-sharing policies so that returning diaspora are not displacing or ‘crowding-out’ the local employment market</li> <li>• Strengthen diaspora support to coordinated programs</li> <li>• Integrate government systems at the national, district and local levels</li> <li>• Emphasise conflict sensitive programming through formal, traditional and external (bilateral and multilateral) resource distribution mechanisms</li> <li>• Provide 'one health" veterinary services for disease outbreaks</li> <li>• Improve services to slums, city planning and infrastructure to manage urbanization</li> <li>• Develop policies and incentives for private sector investment in primary schooling</li> </ul>	<ul style="list-style-type: none"> <li>• Expand the sewage system</li> <li>• Strengthen health system service provision and access to services for women and youth</li> <li>• Incorporate traditional education in the curriculum</li> <li>• Improve governance of service delivery (inclusive, accountable, transparent) at all levels</li> <li>• Explore microfinance initiatives for men and women</li> <li>• Improve teacher training and teaching methods, incorporating gender sensitive approaches</li> <li>• Coordinate health, WASH and nutrition programmes</li> <li>• Enforce international laws</li> <li>• Develop and manage water resources to mitigate against flooding and the displacement of people</li> <li>• Reform and strengthen the links between formal and traditional governance</li> <li>• Develop open data policies to increase transparency and access to information</li> <li>• Improve road construction design</li> <li>• Strengthen land tenure systems</li> <li>• Organise an 'alternative energy fair' to attract large scale renewable energy investment and encourage investment in the energy sector</li> </ul>

D. Policies, programmes and activities at **community level** to boost three types of resilience-strengthening capacities

Absorptive Capacity	Adaptive Capacity	Transformative Capacity
<ul style="list-style-type: none"> <li>• Promote early age learning</li> <li>• Establishment of school and community gardens</li> <li>• Develop gender &amp; youth based programs</li> <li>• Provide support for flood control, water conservation and water supply management</li> <li>• Promote hygiene and sanitation awareness</li> <li>• Support increased capacity in livestock management and seed storage</li> <li>• Promote community level natural resource management and awareness</li> <li>• Strengthen community engagement in formal and informal justice systems, conflict mitigation and resolution</li> <li>• Strengthen the inclusion and participation of women, youth and minority groups in customary systems</li> <li>• Introduce disaster risk reduction programs in schools and communities</li> <li>• Support community road repair committees</li> </ul>	<ul style="list-style-type: none"> <li>• Encourage better public-private partnerships for education</li> <li>• Diversify livelihoods – settlement programmes for pastoralists, alternative livelihoods for women and youth</li> <li>• Community based disaster risk management and information exchange</li> <li>• Provide support to improved awareness on seed systems, food value chain development, alternative livelihoods, natural resource management training and irrigation infrastructure</li> <li>• Awareness raising around the constitution</li> <li>• Integrate government systems at the national, district and local levels</li> <li>• Emphasise conflict sensitive programming through formal, traditional and external (bilateral and multilateral) resource distribution mechanisms</li> <li>• Increase understanding of the linkages between land ownership and political, social and economic capacities</li> <li>• Strengthen community early-warning systems</li> <li>• Alternative schooling i.e. radio schools for distance learning and education;</li> <li>• Promote solar power and renewable energy sources in schools</li> </ul>	<ul style="list-style-type: none"> <li>• Coordinate health, WASH and nutrition programmes;</li> <li>• Improve literacy and numeracy to improve business management skills and enable scale-up of businesses</li> <li>• Nutrition education for elders, local stakeholders, religious leaders</li> <li>• Address community dependency on the diaspora and other external sources for financial support</li> <li>• Diaspora business people encouraged to come to Somalia and mentor/present their success stories</li> <li>• Provide support for fish marketing, irrigation and infrastructure</li> <li>• Promote individual accountability within the customary system</li> <li>• Reform and strengthen the links between formal and traditional governance</li> </ul>

E. Policies, programmes and activities at **household level** to boost three types of resilience-strengthening capacities

Absorptive Capacity	Adaptive Capacity	Transformative Capacity
<ul style="list-style-type: none"> <li>• Support self-help group movements</li> <li>• Increase women's access to credit</li> <li>• Early-warning systems for rapid onset disasters and to broadcast market prices and exchange rates</li> <li>• Develop a fodder voucher scheme</li> </ul>	<ul style="list-style-type: none"> <li>• Geographical expansion of hygiene services</li> <li>• Mainstream nutrition sensitive programming</li> <li>• Improve community resilience through behavioural change and by creating women groups to support new mothers and pregnant women</li> <li>• Improve agricultural practices through crop diversification, soil and water conservation and the introduction of drought resistant seeds</li> </ul>	<ul style="list-style-type: none"> <li>• Document traditional knowledge</li> <li>• Explore the value addition of livelihood products</li> <li>• Promote individual accountability within the customary system</li> </ul>

## Identifying key priorities to support resilience in Somalia

The participants selected 30 priority actions to strengthen the resilience of pastoral, agro-pastoral and peri-urban communities in Somalia. The figure in parenthesis represents the number of votes that participants gave to the different policy, programme and activities. Suggestions in bold gathered over 10 votes.

Level of engagement	Absorptive Capacity	Adaptive Capacity	Transformative Capacity
Global/ East Africa Region			<ul style="list-style-type: none"> <li>• Develop transboundary agreements for water and livestock (2)</li> </ul>
National	<ul style="list-style-type: none"> <li>• <b>Strengthen government revenues and capacities (21)</b></li> </ul>	<ul style="list-style-type: none"> <li>• <b>Improve the value chain (storage processing, transport, marketing, branding, export markets (livestock, agriculture and fisheries, tuna, banana, frankincense, crops, live animals, skin, hide and skins) (33)</b></li> <li>• <b>Less humanitarian aid, more development through federal government, humanitarian safety nets delivered through government. Decrease dependency. Develop or reinforce a local tax system to enable local investment in services ensuring equitable use (15)</b></li> <li>• Reform and transform formal recognition of customary systems (0)</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Scale up of youth education and technical training to prepare young people for diverse livelihoods while creating employment opportunities with a gender lens , and supporting national development (42)</b></li> <li>• <b>Develop and implement inclusive national resources management policies on water, forest, land use ,fisheries, livestock and energy (25)</b></li> <li>• Clarify land ownership and land use law including the role of women and enforce it (5)</li> <li>• Create a solidarity fund linked to social protection framework (first establish financial systems and access and then use remittances better) (4)</li> <li>• Strengthen land tenure systems (3)</li> <li>• Promote investment in renewable energy (3)</li> <li>• Policy on investment groups, financial regulation, and an inclusive banking sector ( including KHAW bank) (3)</li> </ul>

Regional/ District	<ul style="list-style-type: none"> <li>• Ensure civil society is integrated not divisive and is more accountable (5)</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Build basic social infrastructure (schools, clinics, water) (22)</b></li> <li>• Invest in market/value adding infrastructure and roads (-public-private partnerships) (6)</li> <li>• Multiple-use water infrastructure (6)</li> <li>• Ensure conflict sensitive programming through formal traditional and external channels (4)</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Improve governance of service delivery (inclusive, transparent, accountable) at all levels (local, regional, national) (17)</b></li> </ul>
Community	<ul style="list-style-type: none"> <li>• <b>Expand the reach of early-warning systems and DRR programmes (16)</b></li> <li>• Greater inclusion of women, youth, and minority groups in customary system (8)</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Community based system to deal with hazards and risks (12)</b></li> <li>• Reconciliation (inter clan) happening at local level, coordinated and supported by framework from national level (8)</li> <li>• Capacity building for improved natural resources management, agriculture, water and livelihoods (water shed management).(3)</li> <li>• Integrated, coherent public health approach including WASH nutrition health (4)</li> <li>• Diversifying livelihoods settlement programmes</li> </ul>	<ul style="list-style-type: none"> <li>• Improve business management skills to enable scale up of businesses (4)</li> <li>• Structure the involvement of the diaspora to make full use of their skills and assets - both financially and through skills in kind support and experience)(1)</li> </ul>
Households	<ul style="list-style-type: none"> <li>• Support self-help groups for marginalized groups particularly women and youth (2)</li> </ul>		

## Next steps

As participants pointed out, it is essential to work on actions supporting transformative and adaptive capacities along with actions supporting absorptive capacities. The Resilience Systems Analysis helps to cut through some of the divide between development, humanitarian and peace building work. It insists on the importance of sustainable programming.

The various stakeholders can now use the draft resilience roadmap to enrich their respective plans to support the resilience of the pastoral, agro-pastoral and peri-urban communities in Somalia. As demonstrated by the Resilience Systems Analysis, working together in a coordinated manner simultaneously at the various levels of society is essential to effective policy and programming towards resilience.

- SOMREP and BRICS will use this analysis to inform their planning, looking at what is currently being done by the various stakeholders and what needs to be added.
- Some suggested actions require changes in policy which should be taken up by the Somali Government and donors. The Government of Somali welcomed the analysis and the participatory process around it. The ministry of livestock explained how the output will specifically contribute to its Ministry plans and the analysis should feed into the donor group meeting for Somalia, scheduled for April 2015.
- The OECD will use the roadmap to inform the high level mission led by the DAC Chair at the end of March 2015.

*“The process was well organised and helped to understand how to do a systems analysis, this is the map we will now follow, and all the participants will have our full support to help implement it.”*  
*Representative of the Somali Government*

## Annex 1: Workshop agenda

Resilient Systems Analysis		24 <sup>th</sup> of February 2015	25 <sup>th</sup> of February 2015
<i>Morning</i>	8.00 – 9.00	<b><u>Opening</u></b> Participants registration, introductions and security briefing  <b>Workshop Objectives</b>	Feedback on Day 1: Evaluation and suggestion box
	9.00 – 10.30	<b><u>Introduction: What is resilience ?</u></b>	<b><u>Module 3</u></b> Analysis of stakeholders and processes influencing livelihood system
	30' break		
	11.00 – 12.30	<b><u>Module 1</u></b> <b>Risks, stresses and their impact on agro pastoral and pastoral livelihood systems</b>	<b><u>Module 4</u></b> <b>Identifying gaps in livelihood systems resilience</b>
12.30 to 13.30		<b>Lunch</b>	
<i>Afternoon</i>	13.30 – 15.00	<b><u>Module 2</u></b> <b>Reflecting on assets per livelihood capital, and their characteristics to explain how they react to shocks</b>	<b><u>Module 5</u></b> <b>Priorization and drafting of a road map To boost resilience</b>
	30' break		
	15.30-17.00	<b><u>Module 2 ( continued)</u></b>	<b><u>Module 5 (continued)</u></b>
	17.00 – 17.10	<b>Evaluation of Day 1</b>	<b>final evaluation</b> <b>Social events</b>

## Annex 2: Workshop evaluation

42 participants took the time to fill in the final workshop evaluation. Their overall level of satisfaction with the workshop was graded **8 out of 10**. They thought that the main objectives of the workshop were partially to well achieved. Several insisted on the importance to have the voice of the community and of the Somali civil society at the table, as well as business people. *(Note: Invitations had been extended to these stakeholders who unfortunately could not participate.)*

Participants appreciated the numerous occasions to discuss and share expertise, as well as the networking opportunities with such a wealth of stakeholders in the room. Some would like to get a training of trainers on the methodology. The linkages between the risk analysis and mapping, the stakeholder analysis and the capacities per asset should be more explicit.

The table below provide an average of participants' grade on the following items

<i>How would you rate...</i>	
1. Overall delivery of the workshop	<b>8.1</b>
2. Usefulness of tools provided	<b>8.1</b>
3. Time allocation for different sessions of workshop	<b>8.1</b>
4. Level of group work during the workshop	<b>8.7</b>
5. Flow between the sessions	<b>8.4</b>
6. Opportunity to raise concerns and discuss issues	<b>8.3</b>
