- **Integrated approach** : social mobilization around WASH-sensitive preventative measures , hygiene and sanitation education, provision of clean water and/or water purification tablets; equipping health facilities with supplies and skills and support with Infection Prevention Control; continued promotion of optimal nutrition practices

# WV Response to Cholera

Example from a recent response in 2 villages of Monduli district of Tanzania (120 cases)

- Community sensitization on hygiene and sanitation
- Support the government-led treatment unit through equipping them medicines and medical supplies for case management and by facilitating needed transportation
