

KEY MESSAGE FROM THE COUNTRY DIRECTOR

This year, we were able to reach out to over 1.5 million people in-need in South Sudan. Every year that we are reminded of the achievement is a constant inspiration for us. It brings to mind the cooperation of the communities, the smile in the children's faces and the hard work of over 1,000 staff around the country.

What makes us very proud is that every day that make up the year 2018 is a test of resilience and courage from all sides. It is a joint effort. Hand-in-hand we do it together. We can do our work succesfully with the full support of the communities, our partners and various government agencies, our donors, our staff and the World Vision Partnership.

Working in fragile contexts is often challenging, and always with complex dynamics. They keep us on our toes and pushes us to be better at our jobs because people, especially the children, are waiting down the line for us.

World Vision's leadership is highly-regarded in the NGO community and by the UN agencies, most of whom are our partners and offer crucial support in many of our initiatives. This relationship gives us a strong leverage in helping make our work more efficient and faster.

In so many times we have reached out to these partners for support and we salute them for being with us when we needed them most.

We will focus more on a balanced humanitarian assistance with longer term recovery and resilience initiatives to bring about sustained change in communities we work with. It is our hope that many displaced people and refugees will return home and World Vision will be there working with all partners to help realize the dreams of many south Sudanese.

As we move forward to 2019, it is our sincere desire to keep getting better at the work that we do and increase our reach to remote areas where our support is much needed.

MESFIN LOHA

Country Program Director World Vision South Sudan

"

We can do our work succesfully with the full support of the communities, our partners and various government agencies, our donors, our staff and the World Vision Partnership.

KEY ACHIEVEMENTS

EDUCATION

193,465 people

IT TAKES A NATION

World Vision South Sudan is deeply committed to working alongside the people of South Sudan, the international community and partners to realize an end to violence against children. On October 1st 2017, World Vision South Sudan launched its national campaign, It Takes A Nation to Protect the Future Generation. The campaign focuses on the protection of children and youth, including reduction of gender-based violence (GBV) and promotion of gender equality. The It Takes A Nation campaign focuses on the centrality of protection and the promotion of human rights, specifically those that protect children and promote equality of women and girls.

The campaign has the following objectives:

- 1 Increased awareness, changed attitudes and behaviours at community level that promotes protection and reduction of all forms of violence affecting children and their families, particularly GBV.
- Strengthening prevention, mitigation and response measures to address violence against children.
- 3 Increase in short term and multi-year targeted funding to promote the protection of women, girls, boys and men, both through targeted and mainstreamed approaches.
- Strengthen accountability for implementation of global commitments to end violence against children (SDGs, World Humanitarian Summit, Humanitarian Architecture) in South Sudan

For more information, download a copy of the 2018 It Takes A Nation Campaign Report.

INTERNATIONAL DAYS CELEBRATED

Breastfeeding Week
Handwashing Day
HIV/AIDS Day
World Health Day
Red Hand Day

Mental Health Day
World Food Day
International Day for the Elimination of Violence Against Women
World Malaria Day

Universal Children's Day

In line with the field office strategy, the health, nutrition and WASH sector have contributed to the three Child Well Being outcomes:

1) children are well-nourished, 2) children are protected from infection, disease and injury, and 3) children and their caregivers have access essential health, nutrition and WASH services. Programs focused on prevention, promotion and curative activities in order to save lives of beneficiaries, especially children, pregnant women and lactating mothers. Comprehensive WASH programme targets communities, schools and health facilities. The health, nutrition and WASH interventions are provided in an integrated manner in order to achieve better results.

Summary of Achievements

1,503,001 people received healthcare and treatment from World Vision supported health facilities

444,500 people learned about water and sanitation hygiene behavioral change

438,053 children and pregnant and lactating mothers were screened for malnutrition

73,041 mothers attended 1st antenatal care at World Vision supported health facilities; **31,998** mothers attended 4th antenatal

165,572 malaria uncomplicated cases were clinically diagnosed among children under 5

90,423 children under 5 with diarrhea received care and treatment using oral rehydration solutions

25,301 mothers attending antenatal care received long-lasting insecticide treated mosquito nets

27,255 children and adults were screened for Ebola Virus Disease through World Vision's response on Ebola

217,770 people were provided with access to clean water

628,098 people received nutrition services

12,111 mother deliveries in health facilities were supported by a skilled birth attendant

51,678 children under 5 with presumed pneumonia received care and treatment

30,80 l children under 5 received long lasting insecticide treated mosquito nets

56,171 children under one year completed immunization through static and community outreaches

8,162 children received vitamin supplements

Best Practices

Nutrition and health services used different approaches which included facility-based services, outreaches and mobile clinics and rapid response mechanisms which resulted to over 1.5 million people who received support. Over 620,000 children, pregnant and lactating women living in urban and hard to reach locations were reached with lifesaving integrated health, nutrition and WASH services. Evidence shows that community approaches improve linkages between the community and the health facility by providing integrated community case management using home health promoters (HHPs), and also by providing community-based management of acute malnutrition using community nutrition volunteers (CNVs).

Hygiene promotion activities are being provided to community by HHPs using a functional and well-coordinated referral system. This approach increases reach of people with behavioral changes.

Stakeholders are key in increasing access to reproductive health and family planning by involving community structures such as Boma Health Committees, Men Champions, Mother to Mother Support Groups, HHPs in reproductive health awareness activities. Management of water points are done by community structures known as Water Management Communities.

Engagements with the media continued to update and utilized in raising awareness on different thematic areas such as acute malnutrition, importance of breastfeeding, HIV prevention and access to anti-retroviral therapy, Ebola Virus disease awareness campaign, the importance of handwashing at critical times in order to prevent diseases, the importance of sleeping under mosquito nets and the importance of immunization among others.

Advocacy and Campaigns

- Breastfeeding Week
- Handwashing Day
- HIV/AIDS Day
- World Health Day
- World Malaria Day
- Mental Health Day
- · Gender Equality and Social Inclusion in Health

External Engagements

- A member of the health cluster strategic advisory Group and is also member of different technical working groups, among EPI,
 EPr & R, Nutrition Information, CMAM, MIYCN and Boma Health Initiative among others
- A member of the health, nutrition and WASH clusters and works in collaboration with various partners and stakeholders among them the MOH, the Ministry of Water and irrigation, HPF, WFP, UNICEF, UNFPA, WHO, SSHF technical secretariat, EVD strategic Advisory Group
- A member of the health cluster Strategic Advisory Board (SAG)

Models & Approaches Used

- CMAM CCM
- Boma Health Initiative
 PD Hearth
- Timed and Target Counseling and
 Channels of Hope
- Maternal and Child Health
- Integrated water, sanitation and hygiene promotion

Evidence & Learning

- A 2018 Barriers Analysis study
- Four SMART surveys contributed to the data used for analysis and aggregation of the South Sudan Integrated Food Security Classification (IPC) and informed the Humanitarian Needs Overview (HNO) and the 2019 Humanitarian Response plan (HRP)

Citizen Voice and Action (CVA)

Expansion

Using both emergency and development approaches, continue to provide health, nutrition and WASH interventions with focus on quality programming and will scale up its Rapid Response Mechanism's capacity, both in terms of human, financial and logistical resources.

Summary of Achievements

297 schools supported under education programming

4,221 children attending Early Childhood Development Center

48,497 children received scholastic materials including pens, books, erasers, and learning aids

5 four stance gender-sensitive latrines constructed and 139 hand washing facilities distributed to schools

428 teachers trained in various training approaches

25 life straws distributed to schools in efforts to increase access to safe drinking water in schools

55,986 children enrolled into core primary schools

10 classroom blocks rehabilitated, or constructed and 12 temporary learning structures constructed

105,816 children reached with school feeding program to promote attendance, retention and completion

775 teachers and 517 support staff supported with incentives

400 children from four schools in Juba, participated in sports for peace activities

1,384 children received birth certificates

Education programming focused on promoting access to learning opportunities, improving literacy and numeracy, and strengthening cognitive skills among children reaching an overall 193, 465 children and their family members; of these, 155,202 were children.

Advocacy and Campaigns

- Back-to-School campaign launched by the Ministry of Education and World Vision.
- Girls Education campaign in collaboration with the Education Department conducted in Upper Nile, Western Equatoria,
 Warrap and Juba Zones.
- 16 Days of Activism to End Violence against Children as part of the It Takes a Nation campaign.

Key Models and Approaches

- Unlock literacy
- · Citizen Voice and Action
- Go-Baby-Go
- · Temporary Learning Structures (TLS),
- · Education in Emergencies
- · Early Childhood Development

Partnerships

- · Ministry of education at National and state level to ensure supervision of schools and quality of teaching
- Partnership with UNICEF through a PCA supporting 116 primary schools
- South Sudan Athletics and Football Association in implementation of sports for peace activities
- · State Ministry of Health in implementation of child birth registration in Juba
- · Scripture Union hosted by ACROSS in implementation of spiritual nurture of children

Research Undertaken

- · Conducted project baseline survey with support of local partners and line ministries for education.
- Conducted the GAC education needs assessment in five schools of Rajaf County, the local authority, NGOs and report documented and shared.

Expansion

- · Menstrual hygiene management kits distribution to adolescent girls in efforts to promote retention for the girl child.
- Supporting sports for peace in schools with Central Equatoria for about five schools.
- Supporting establishment of libraries in the five schools supported in Rajaf County in Central Equatoria.
- Expand support to building skills, supporting schools and communities to embrace continued life time learning, setting up a
 school environment that promotes girls education, building teachers capacity to support learner centers learning and promote
 ownership of school development programs by the communities.

4,39 | people supported with protection services; including 107,213 children

25 child-friendly spaces and 5 women and girl-friendly spaces supported

1,790 children and their families reached with Mine Risk Education messages

1,384 children supported to access birth registration certificates

607 former children associated with armed forces and groups supported with protection and reintegration services

14,03 | people acquired protection skills through cash programming interventions

61,885 people reached with awareness raising, attitude, and behaviour change initiatives focused on child rights, GBV, and protection issues overall

World Vision prioritized a comprehensive approach to address the protection risks experienced by children. This approach included the establishment of comprehensive child protection case management services and focused psychosocial support (PSS) provided by qualified national social workers. As part of this approach, World Vision increased community-based PSS and child protection systems at the community level through child-friendly spaces (CFS), child-help desks and initiation, training and coaching of community-based child protection committees.

World Vision has interlinked child protection response services with Gender-Based Violence (GBV) Prevention and Response programming, recognizing the high number of child survivors of GBV. A critical risk to the lives and safety of children in South Sudan are explosive remnants of war, including unexploded ordnances (ERW/UXOs) and greatest number of deaths occur among children under the age of 15 while playing. World Vision recognized the need to advocate for children's safety, and the opportunity for impact by expanding child protection programming to include Mine Risk Education, specifically for children.

Advocacy and Campaigns

- It Takes A Nation Event in partnership with the University of Juba
- Recognition

Key Models and Approaches

- · GBV Mainstreaming in key sectors such as Nutrition, WASH, Food Security & Livelihoods were developed and rolled out.
- · Child Protection: Child-Friendly Spaces (CFS) and provision of Psychosocial Support (PSS), Comprehensive Child Protection
- · Case Management (in alignment with the SOPs & Toolkit for South Sudan), Child Rights and Child Protection Clubs, Community-Based Child Protection Mechanisms, Channels of Hope: Gender, and UNICEF South Sudan's PSS & CFS Toolkit.
- · Gender-Based Violence: IASC GBV Basic Principles & Guidelines, IASC GBV Mainstreaming Guidelines, IASC Case Management, PSS packages focused on Caring for Survivors – and Child Survivors – of Sexual Violence (UNICEF, UNFPA, IRC packages), WHO Clinical Management of Rape, Psychological First Aid, and Channels of Hope: Gender Equality.

- Mine Action: Mine Risk Education (including community liaison, community mapping, data gathering, safety briefings), and hazard identification.
- Protection: Protection Mainstreaming, including within RRM teams.

Partnerships

World Vision is a partner in GBV Sub Cluster, CP Sub Cluster, and Mine Action Sub Cluster (for MRE activities), and a member of the Protection Cluster.

Research Undertaken

- Presented at the ECHO Global Call to Action to Protect Against GBV in Emergencies Symposium, in a panel discussion with UNHCR as a thought leader on "what works" for mainstreaming GBV in Food Security interventions, sharing achievements of the FEED Project, which realized a 5% reduction in GBV.
- · Prepared, submitted and disseminated "Partnering With Faith Actors to End Violence Against Children" paper to the Joint.
- · Learning Initiative, in support of the Global Church Forum for Children on the Move.
- Produced and published the case study: "Supporting Survivors of Sexual Violence through Faith & Community Advocacy."
- Completed and published the Girls on the Move Report, showcasing World Vision South Sudan's approach to GBV response for adolescent girls and a feature story.
- Completed and published the Children on the Move Displacement Report, showcasing a case study from World Vision South
 Sudan on the impact of displacement for survivors of sexual violence.
- A research evaluation case study on reducing stigma towards survivors of sexual violence and the involvement of faith leaders in this work.
- Completed an abstract report on Early Child Marriage in South Sudan as a contribution to the Office of the High Commission on Human Rights Report.
- A coalition NGO Policy Brief for UN General Assembly for the special panel on South Sudan, in collaboration with peer NGOs and World Vision Global Center.

Expansion

- Projects with a focus on raising awareness and changing attitudes and behaviors increased from 3 to 12; operational zones with
 programming and capacity increased from two to all four zones and geographic coverage within those zones increased by an
 average of 30% (number of counties, payams within the operational zones).
- World Vision South Sudan launched an Access to Justice Program pilot in Juba. The program focuses specifically on increasing
 awareness of South Sudan's domestic legal and policy environment to promote civil society knowledge of South Sudan's
 protective rights and laws for children, equal rights for women and girls, and the criminalization of most forms of GBV.
- A critical risk to the lives and safety of children in South Sudan are Explosive Remnants of War, including Unexploded Ordnances (ERW/UXOs). The greatest number of deaths attributed to ERW/UXOs occur among children under the age of 15 and whilst playing. World Vision recognized the need to advocate for children's safety, and the opportunity for impact by expanding child protection programming to include Mine Risk Education, specifically for children. In August 2018, World Vision South Sudan established, trained and received UNMAS accreditation for two dedicated Mine Risk Education teams.
 (Note: World Vision has a total of four accredited MRE teams, with the next two receiving accreditation in FY19 Q1, November 2018).
- World Vision South Sudan launched an ambitious Child Soldier Reintegration programme in collaboration with UNICEF. On February 7, 2018 over 300 children associated with armed forces/armed groups (CAAFAG) were released by the National Demobilization, Disarmament & Reintegration Committee into World Vision South Sudan's care. During the initial three months of release, this included the running of two interim care centres for unaccompanied and separated minors (UASCs) as family tracing takes place. Children with serious protection concerns in their home were also supported with interim care whilst alternative care solutions were identified.

Summary of Achievements

689,400 most vulnerable people received food assistance

142,488 people received 6.6m USD under cash voucher programming

Over **79,000** children received assistance through the Food
For Education project targeted counties prone to food insecurity, aiming at increasing equitable access and utilization of education through in-school meals and girls' take home rations

3,032 people benefitted from FFA aiming to enhancing the resilience of communities and households, through food assistance and livelihoods

15,470 people benefited from trainings on improved agricultural practices and inputs ranging from tool, fishing kits, and improved seed varieties

37,714 metric tons of nutrition supplements and food supplies of different commodities were distributed to the most vulnerable households

50,000 people received nutrition assistance through Targeted supplementary feeding programme aimed at reducing or stabilizing acute malnutrition by rehabilitating moderately malnourished children of 6-59 months, and pregnant and lactating women

12,000 people completed business-related trainings

2,000 people trained in household financial management

20,000 people trained in Natural Resources Management Techniques

Crop adaptive trails of sorghum for

- 49 varieties, 6 pearl millet varieties and
- 6 orange flesh sweet potato varieties inTonj North, Juba and Melut

Best Practices

World Vision's seed system development research adaptive trials research on selected sorghum varieties is one of the efforts being undertaken to contribute towards improving household food security and livelihoods. This research aims to widen variety and choice for farming communities. This will be achieved through increasing production, first with empirically testing seed adaptability, and through introduction of high yielding, disease resistant and climate smart varieties. In this research, World Vision conducted crop adaptive trails of sorghum for 49 varieties, 6 pearl millet varieties and 6 orange flesh sweet Potato six varieties in Tonj North-Warrap, Rajaf- Juba Area and Melut- Upper Nile). Evidence adduced from the first year participatory adaptive trails which incorporated both farmers observation and reflections together with field data collected as per ICRASAT (International Crops Research Institute for the Semi-Arid Tropics) standard; eight sorghum varieties, 4 pearl millet and 5 OFSP varieties registered positive successful outcomes. However, to revalidate the findings, these varieties are undergoing second round tests before release to the other farmers. This research is being implemented in collaboration with the Ministry of Agriculture Research Department, Agricultural University, ICRASAT Kenya and Mali together with Food Security Advisors under the South Sudan Integrated Food Security and Livelihood Project funded by the Australian Government, Department for Foreign Affairs and Trade (DFAT) through the Australia NGO Cooperative Programme (ANCP) funding mechanism.

Advocacy and Campaigns

World Vision actively contributed and participated in the celebration of the World Food Day in Juba South Sudan. The day was in line with World Vision's support towards improved food production which seen as one of the key solutions to the unprecedented current high food insecurity levels.

External Engagements and Key Partners

- · Co-leader at the national food security and livelihood cluster
- · A member of 3 state level clusters
- A prime contractor for two consortium projects which consisting of national and international NGOs
- · Food Security and Agriculture ministry
- · Food and Agriculture Organization
- · Food Security and Livelihoods partners implementing food security projects

Key Models and Approaches

- General food distribution (GFD)
- Food for assets (FFA)
- · Cash for assets (CFA)
- Blanket supplementary feeding programme (BSFP)
- Targeted supplementary feeding programme (TSFP)
- · Food for education (FFE)
- · Building secure livelihoods;
- Post-harvesting handling; Storage and marketing
- · Farmer managed natural regeneration (FMNR)
- · Savings groups model with village savings and loans approach (VSLs) using the graduation approach
- · Climate smart agriculture

Research Undertaken

Adaptive seed trials at Rajaf and Aweil under the ANCP project. A seed systems assessment was carried out to contribute towards a sustainable seed systems approach for World Vision. Research on local trees on health and nutrition was carried out by a Canadian research company.

Expansion

World Vision will significantly expand towards resilience programming and conditional cash and voucher based transfers. Central to expansion, the needs of women and rights are core achieving inclusive food security and livelihoods, targeting to achieve at least 50% participation for women or girls, with a focus on intra household food consumption, women friendly livelihood initiatives and empowerment in building community and household resilience. Under five children, the elderly, chronic sick and disabled are part of our "vulnerability" targeting criteria.

Significant progress achieved towards improving and demonstration of spiritual well-being for children and their families.

Summary of Achievements

79 schools reached in collaboration with Scripture Union South Sudan

324 school teachers and church representatives trained in faith and development

12,587 children and their families reached with spiritual nurture

Channels of Hope models across different sectors such as Maternal and Child Health and WASH

External Engagements

- Great Lake Initiative (GLI)
- · Local inter-Church committee in various locations
- (Malakal, Kuajok, Yambio, and Tonj towns for instance)
- Tear Fund
- Scripture Union South Sudan

- Chiefs
- Evangelical Alliance
- ALARM
- Mennonite Central Committee

Best Practices

Partnership with Great Lake Initiative and local inter-Church committees in various locations such as Malakal, Kuajok, Yambio, and Tonj towns, traditional chiefs, Evangelical Alliance, ALARM, Tear Fund and Mennonite Committee has promoted grassroots advocacy around peace building and reconciliation.

Advocacy and Campaigns

ITAN: It Takes a Nation campaigns engaged churches and traditional chiefs to mitigate societal issues around peace building, education, malnutrition, and early child marriage.

Key Models and Approaches

- Celebrating Families Curriculum (CFC)
- Channels of Hope (COH)
- Do No Harm (DNH)

Research Undertaken

- Presented at the ECHO Global Call to Action to Protect Against GBV in Emergencies Symposium.
- Produced and published the case study: "Supporting Survivors of Sexual Violence through Faith & Community Advocacy."
- · Published the Girls on the Move Report, showcasing World Vision South Sudan's approach to GBV response for adolescent girls.
- Published the Children on the Move Displacement Report, showcasing a case study from World Vision South Sudan on the impact
 of displacement for survivors of sexual violence.
- Completed an abstract report on Early Child Marriage in South Sudan as a contribution to the Office of the High Commission on Human Rights Report.

Evidence and Learning

Faith Landscape Mapping Survey Completed: The objective of this paper was to identify how World Vision could play a greater role in working alongside faith leaders of all denominations in South Sudan to strengthen humanitarian response and contribute to peace and resilience of children and their communities.

Areas for Expansion

- World Vision South Sudan launched an ambitious Child Soldier Reintegration Programme in collaboration with UNICEF, and will
 continue this work into 2019.
- World Vision South Sudan launched an Access to Justice Program pilot in Juba. The program focuses specifically on increasing
 awareness of South Sudan's domestic legal and policy environment to promote civil society knowledge of South Sudan's protective
 rights and laws for children, equal rights for women and girls, and the criminalization of most forms of GBV.
- · World Vision South Sudan will continue to address prevention and response measures for child survivors of GBV.

Farmers like Omar in South Sudan are making a breakthrough in helping end hunger and poverty in the communities.

"My family struggled to have meals every day. With farming, we now have enough food. I learned about the irrigation and the use of organic pesticide. We now organize planting our vegetables. Farming is the best."

- Omar Shokab, farmer from Malakal, Upper Nile State

Watch: Omar's promise
